Post Office Box, No. 770.

JOHN HUTCHISON. — J. ELLIOT BRYSON.

REFERENCES.—Hon. J. R. Thibault, Andrew Robertson, Esq.; Wm. O'Brien, Esq.; Jas. Davison, Esq.

## PHOSPHATE OF LIME!

### NEWELL'S PATENT UNIVERSAL GRINDER

The public is presented with a new mill which is designated as above. It can be adapted to a greater variety of purposes than any mill heretofore invented.

The following are a few results, substantiated by experiments, which illustrate its remarkable utility:

I. Its General Capacity. This Grinder gives perfect satisfaction in the pulverization of Quartz, PHOSPHATES, Zinc, Bone, Brimstone, Chemicals, Oyster-Shell, Horn, South Carolina Chy, Chalk, Cement, Cork, Coals and other Cereals, Colico, Spices, Leaf Sugar, Mustard and Flax Seed. Also in the grinding of planing shavings, for packing purposes and horse bedding, the pulverization of Knots, Dye Woods, Tobacco, Rubber, Rope, Ole Cloth, and the reduction of Wood to fibrous material for use in the manufacture of Paper.

II. Its Special Adaptations. For grinding Flax Seed it has no rival. A great saving of time and labor is secured by grinding instead of mashing this article. Mustard Seed is also effectively ground to powder.

III. Superior Quality of the Product. The superior quality of the products of this mill is observed in the grinding of Corn and other kinds of Grain. The process does not heat the Flour or Meal, even if grinding at the rate of 200 bushels of Corn per hour. All danger of fermentation is thus avoided. Every kind of grain is perfectly pulverized without taking from the mill any particle of grit.

IV. The Saving of Power and of Time. A great saving of power and of time in the accomplishment of any one of the uses above mentioned are among the points in which the mill must inevitably hold the highest place in the esteem of all who witness its capacity. The following few facts explain what is now said. Quartz is ground to remarkable fineness at the rate of ten tons per day. So also the HARDEST OF THE PHOSPHATES. Corn can be ground for meal, using only one-tenth of the power, as rapidly as by the use of stone; so that the conclusion is clear, that the mill costs less and will do more, than any other mill yet invented.

V. Available Everywhere. Its usefulness to Farmers, and keepers of large stables is a fact noticed. It is so cheap and so easily portable that it can be brought into general use in Villages all over large Farms. It can be run with one-horse power, grinding twenty-five bushels of Corn for every hour, and with four-horse power it will grind up to 200 bushels per hour. The grinding discs can be easily and cheaply replaced should they become worn. The weight of these machines varies from 200 to 800 pounds. They are very compact, requiring only a space three or four feet square, exclusive of apparatus for bolting. The frames are made either of wood or of iron. The price of these machines ranges from \$300 to \$400, subject to a 25c. to 50c. royalty for the use of them; the tariff whereof being regulated by the specific purpose to which the mills are applied.

A cordial invitation is extended to *Phosphate Companies and owners of Phosphate lands*, to all *Millers, Quartz Crushers, Chemical Manufacturers, Farmers, and others who have any interest in such improvements*, to call and see the machine and the samples of the materials ground at **W. D. McLENNAN'S, Union Mills, 55 College street, Montreal, Montreal, June, 1878.**

## PACIFIC RAILWAY TENDERS.

TENDERS for the construction of about one hundred miles of Railway, West of Red River, in the Province of Manitoba, will be received by the undersigned until noon on Friday, 1st August next.

The Railway will commence at Winnipeg, and run North-westerly to connect with the main line in the neighborhood of the 4th base line, and thence Westerly between Prairie la Portage and Lake Manitoba.

Tenders must be on the printed form, which, with all other information, may be had at the Pacific Railway Engineer's Office, in Ottawa and Winnipeg.

F. BRAUN,  
Secretary.

Department of Railways and Canals,  
OTTAWA, 16th June, 1879.

## HAVE YOU TRIED IT?

### Have you tried Higgin's Eureka Salt?

It will cost but a trifle to do so, and perhaps you may find it the best investment you ever made. A majority of the fine butter makers of the United States are now using it, and makers of fine cheese are just beginning to find out that it pays the biggest kind of a profit to use it. The *American Dairyman* of April 3, says:—

#### IMPROVEMENT IN SALT MANUFACTURE.

"Whether people are familiar with and use Thomas Higgin & Co.'s Eureka Salt or not, they must admit the enterprising and progressive spirit of that firm. It is only about three years since the manufacture of this improved salt was begun, and the statistics of importation now show the following wonderful increase:—

In 1876..... 5,550 sacks.

In 1877..... 32,800 "

In 1878..... 69,045 "

"When we take into consideration the prejudice naturally existing in favor of old established brands, this progress is simply wonderful, and forces the conviction that there must be a basis of superior intrinsic merit behind it."

During the same time the importations of Ashton's, which previously had been considered the best brand known, declined from 96,170 sacks in 1876 to 68,113 in 1878; and all this in the face of great exertion and lavish advertising on the part of the talented agent for the brand.

With the great advantage of its being the oldest and best known brand in the market, if its quality had kept pace with the times, its importations should have increased. If the Higgin's brand had had the advantage of being known to consumers' merchants and dealers in dairy products, it would have taken the country by storm, but dealers, being familiar with the Ashton brand, naturally favored it, until the superior quality of the Higgin brand became known to them. This has been largely accomplished in the short space of three years, and, while there are some yet to be convinced, it is only a question of time. Men who have not experimented and studied the question, naturally do not like to at once relinquish long settled impressions, but after careful investigation and three years' experience, we are prepared to state upon our reputation as merchants and as men, our belief that Higgin's Eureka salt is made by a more perfect process, costs at least one-third more to manufacture, and IS THE BEST SALT KNOWN AT THE PRESENT TIME.

Ask your Salt dealer for Higgin's Eureka Salt, and do not be put off with arguments that the lower priced salt is the cheapest, nor that, because another brand was once considered the best, that it always must continue to be so. TRY AND JUDGE FOR YOURSELVES.

Respectfully, etc.,

**ABRAHAM HODGSON & SONS,**

12 ST. PETER STREET.

Importers for the Dominion.

## G. E. CAMPBELL,

House, Land and Investment Agent.  
\$50,000 TO LOAN.
