

DON'T.

DON'T go working around shafting with anything that can possibly catch in the pulleys, belts, or couplings. If you wear an apron, take it off when at this business, as it is a trap, for if the material does not give way you are liable to go sailing around the shaft, not a very pleasant journey to contemplate. Don't wear a jacket or shirt with ragged sleeves, or, in fact, any projections that could tempt the revolving set-screw or key-way. Of course no such things should be around a shaft, the day for that is past, but do not be careless even if there are no such traps around the shop.
