

fruit industry of these provinces is likely to be among the first in the near future, provision must be made for increased knowledge of the subject.

MR. BLANCHARD moved the following resolution :

*Whereas*,—Nova Scotia, and especially its central counties, have assumed a high position in respect to agricultural possibilities.

*And whereas*,—Their very superior capabilities as a fruit growing district, in the judgment of this association, renders it extremely desirable that an agricultural experimental station should be there established.

*Therefore resolved*,—That this association express great pleasure upon learning that the Dominion Government proposes to establish such stations in various sections of the Dominion, and would earnestly urge that the proposed station for the maritime provinces should be placed in the fruit growing district. Passed.

R. W. STARR, *Secretary, pro tem.*
