

## PERVISION NEEDED

Continued From Page Twelve.

could take eight or ten policemen to them on the street, to say that the child is in the danger of the playground is the right of every citizen. The children's playground is a part of the city. It is a

provident work, and is far less costly than the reformatory and the juvenile court. There is no doubt that the life of a nation is directly related to the games of its people. Give the child a chance to enjoy play well directed, and the possibilities are greater for better men and women and a stronger nation. If the child has played well he will work well. Play is the logical demand of youth, and the child whose play life has been stunted passes into adult life

handicapped for the struggles to come. We teach general education in the schoolhouse, and naturally the playground is the best place to teach play. Play is an education, and it is an education that gives to the young pupil strength, health, alertness, aggressiveness, sympathy, friendship and courage, and better than all, it paves the way for a deeper morality than would come in any other way. Fundamental impulses. It is not the writer's idea to indicate

to any extent the fundamental principles of play, which make it of primary importance in both physical and mental development. The biology of play shows this impulse to be fundamental in all normal human beings. Rather do I desire to point out the necessity of supervised and properly equipped playgrounds, and that organized play is very necessary in the city where the tendency is to repress play activities.

The future belongs to the children, and we of today owe much to the past. Let us be busy in the present in the movement for the establishment of supervised playgrounds, and the organization and encouragement of the play interests of children. In conclusion, I beg to thank the editor for granting space for such a lengthy article, and I cover the whole question by quoting Jacob A. Riis, who said: "To play in the sunlight is a child's right, and it is not to be cheated out of it. And when it is cheated out of it, it is not the child, but the community that is robbed of that besides which all its wealth is but tinsel and trash. For men, not money, make a country great, and joyless children do not make good men." Respectfully submitted,

J. J. SYME,  
South London.

## BISHOP FALLON TO PREACH AT CATHEDRAL

Bishop Fallon preached to a full church last Sunday evening, and was listened to with rapt attention. His subject was, "The Christian's Faith." His subject tomorrow evening will be of equal interest and follows closely upon that of last Sunday, "The Unity of Faith: Unity Is Essential to Truth." A welcome to all.

## BOYS WILL GET ADVICE ON MANY BUSINESSES

Interviewers' Committee Decides on Vocational Guidance Lines.

The practical talks to boys in the upper schools of the city will be the feature of next week's effort in connection with the vocational guidance movement in this city. The interviewers' committee, of which E. R. Dennis is chairman, met yesterday afternoon and considered the various lines of work along which advice might profitably be given in the private interviews for boys in the schools the following week. The lines that were particularly suggested were as follows: Electricians, plumbers and steamfitters, draftsmen, dentists, teachers, lawyers, engineers, druggists, chemists in industrial lines, newspaper workers, printers, physicians, contractors, automobile workers, machinists, building trades, insurance and banking, book-keeping and auditing, advertising and salesmanship, farming and market gardening, railroad work, ministers and social workers, lawyers and scientific investigators.

It is expected that the interviews will constitute one of the most valuable features of the work, as the boys themselves are taking very great interest in the idea. The work that is being carried on in London is the first of its kind that has been attempted in Canada, and there have already been inquiries from other places with regard to the manner in which the plans are being carried out.

## ORDER FROM GLASGOW, SCOTLAND

The Superior Machinery Co., Ltd., of this city received an order today from P. & W. Maclellan, Ltd., of Glasgow, Scotland, asking prompt shipment of a large number of their quick action vices in two sizes. This London firm is the only one in Canada making this particular kind of vice, and the shipment is to be delivered at once to Glasgow. The Superior Machinery Co. is to be congratulated on receiving an order from one of Glasgow's largest manufacturing concerns.

Back of a Healthy Old Age.

Physical fitness does not depend on age—but on the condition in which the blood stream has been kept.

The purity of the blood stream depends entirely on the Kidneys. If the Kidneys are kept performing their function properly year after year, a healthy, sound body is the result, and the ailments that are generally characteristic of old age do not appear.

Insure a healthy body and comfortable old age by keeping the Kidneys in proper shape always with

Woodland Cemetery Office  
CRONYN HALL

LONDON, ONT., 13th Mo. 1919

JAMES H. STEWART, Esq.  
Manager London Mausoleum Co., Ltd.  
314-315 Royal Bank Bldg.

Dear Sir:—

It was only after the most careful consideration and investigation of Mausoleum Construction and Ventilation that we arranged with your Company for the erection of a Communal Mausoleum in Woodland Cemetery.

Your long experience in the United States and your connection with the Mausoleum in Mount Pleasant Cemetery, Toronto, and the Mausoleum for which contracts are awarded in Windsor Grove Cemetery, Windsor, Ont., sale of which you have just concluded so successfully, justify us in believing that we in "Woodland" are going to have the wonderful Memorial you promise.

The crypt purchasers are protected both by your endowment fund to be placed in our hands exclusively for upkeep of the Mausoleum for all time to come, which is very important, and also by the fact that you allow us to appoint an Engineer or Architect of our selecting to check your work as building progresses.

We have no doubt that you in a short time will have disposed of all your crypts and rooms, and we heartily recommend this great project to all citizens who desire above-ground entombment.

Wishing you every success,

We are,

Yours truly,

(Signed)

L. NORMAN TUCKER, Rector  
WALTER H. MOORHOUSE, Church Warden  
JOHN M. SLATER,  
Trustees of Woodland Cemetery

## To the Citizens of London:

I WONDER if the people of LONDON realize what a big thing the TRUSTEES of WOODLAND CEMETERY are doing in granting them an opportunity to secure at LOW COST ABOVE-GROUND ENTOMBMENT in a MAUSOLEUM, which, as far as man can plan, will stand forever, a perpetual monument to the progress of the times, whose solemn and stately beauty will be unsurpassed on the continent and providing a PERMANENT FAMILY RECORD which is impossible in ground burial.

THERE are many months of inclement weather in Canada when you cannot visit the cemetery and with loving hands take care of the resting place of your loved ones who have passed away. In a MAUSOLEUM in all seasons of the year you are out of the cold and the wet and snow.

DID you ever realize that we LIVE ON MEMORIES, as we know nothing of even the immediate future, so that it should be our greatest pleasure, besides our duty, to keep these memories of loved ones as beautiful as possible. GROUND BURIAL has always been REPUGNANT TO FINER NATURES, but not knowing any other course to pursue and not having opportunity to take advantage of anything better, it became custom. MAUSOLEUM ENTOMBMENT robs the grave of its horror, and while your grief is there, your anguish of the graveside is missing and the great dangers to the health of the friends who gather for last sad rites, owing to inclement weather, is done away with. You leave this beautiful building, with its MARBLE WALLS and SCRIPTURAL WINDOWS, not thinking of DEATH, but that your loved one has just passed into the long sleep, that comes to us all. And what a comfort to those left behind to realize that only a few inches from their touch the body they had fondled and caressed will remain as they last saw it for many years to come.

IT IS a most remarkable fact that places of chief interest in almost every noted city are tombs and sepulchres of the dead. The most fascinating spot in England is WESTMINSTER ABBEY, where ENGLAND'S KINGS AND QUEENS are laid to rest; her poets, her statesmen and her philosophers repose. The most interesting place in PARIS is the tomb of NAPOLEON. In SEVILLE, SPAIN, the CATHEDRAL, in which reposes the SARCOPHAGUS OF COLUMBUS. In BERGEN, NORWAY, the grave of OLE BULL. In CHRISTIANIA, the tomb of IBSEN, the strange genius of that weird land. At ROME the places of absorbing interest are the CATACOMBS, the burial places of the early CHRISTIANS. Then there is the imposing tomb of HADRIAN, on the banks of the TIBER. In Egypt, along the mystic NILE, are the PYRAMIDS, the tombs of the PHAROAHs, and many more.

LONDON IS GOING TO HAVE A WESTMINSTER ABBEY, wherein the bodies of the men who have made and are making this fair city will lie in state, to be honored in ages to come.

THIS form of burial, or entombment has grown very rapidly in the United States, Ohio alone having over 100 Communal Mausoleums. Among the well-known towns: Chicago, Cleveland, Buffalo, Toledo, Detroit, Philadelphia, Los Angeles. Canada: Toronto has three, Mount Pleasant Cemetery trustees just completing a 1,300-crypt building, costing over \$300,000. Chatham, St. Catharines, Galt and Windsor building operations starting April 1.

JAMES H. STEWART, Manager.
