COUNTING RAILROAD STRIKE VOTE

Important Developments About Due in Railway Wage Dispute Affecting Lines in Eastern and Central Western States—Strike Hardly Likely

New York, May 16—Important developments are anticipated within the next few days in the railway wage dispute affecting eastern lines and those in the central and western parts of the country. The count of the strike vote ordered recently on the Erie, following the rejection of the demands of the conductors and trainmen, is set for today and awards of the arbitrators on more than one of the New York Central systems west of Buffalo are practically ready. Many of the roads on the eastern territory have already come to terms with their employees on lines more or less closely following those agreed to by employers and employees on the Baltimore & Ohio system. The general agreement among the conductors and trainmen to make practically uniform wage increases on all the roads east of the Ohio and north of the Chesapeake and Potomac. The situation on the Erie is regarded by railroad men as the most critical yet developed. The road has claimed that it cannot afford to pay the rates granted by the R. & O. and Central, and other lines. The men's representatives have insisted that there are serious wage justifications which the Erie has not shown. Hence the strike vote.

PIPE GAS FROM ALBERT TO CITY

San Francisco, Calif., May 16—When representatives of the rival night camps assemble here this afternoon for their second conference on the question of a referee for the Jeffries-Johnson battle at Emeryville on July 4, they will face what is regarded as an extremely delicate situation. NO MAN YET IN SIGHT FOR REFeree

The report has it that Jeffries told a friend he resents the attitude assumed by the negro champion and refuses to be dictated to. Those scheduled to meet this afternoon for a final threshing out of the vexed question are Sam Berger, Jeffries' manager; Jack Johnson and his manager, George Little, and Gleason and Rickard. The conference will be held at Johnson's training quarters at the fighter's request so that he might lose as little time as possible from his training. And the truth of the assertion was attested to by the fighter's subsequent behavior.
