Causes Consternation In Canada's Business Life

Railway Freight Increases Draw Comment

Forty Per Cent. in Eastern Canada, 85 in West, Effective on Next Monday—Grocers' President Condemns Judgment of Commission.

Toronto, Sept. 8.—An announcement of an increase of forty per cent in freight rates in eastern Canada and thirty-five per cent in the west, to become effective on next Monday, has caused great consternation among the leaders in the industrial and business world. Very outspoken last night in condemnation of the railway commission's proposed increase, was Hugh Blair, president of the Canadian Wholesale Grocers' Association, who was prominent in combating the proposed increase during the hearing a few weeks ago in Ottawa.

Predicts Dearer Living.

"It is very much of a surprise to me that the railways should be granted their full requests," he said to the World. "The public cannot have confidence in a commission which gives such a judgment. It is a very serious matter. I was prepared to accept a compromise but I never expected to see the railways get all they asked." "It is a most extraordinary position for the commission to take and will create a great lack of confidence. The result is bound to be a very great hardship upon the consumer. The result must be to raise prices again to a very large degree because the consumer will have to pay at least 100 per cent more than the increase in freight will amount to." Mr. Blair said it appeared to him as though the commission in making the extreme advance applicable for a few months only, had in mind permitting the railways to pile up revenue before the year's end to be used in securing additional equipment.

As Hiram Sees It

"Well," said Mrs. Hiram Hornbaker, reporter, "I'm glad they're beginnin' to think babies is worth nearly as much as pigs an' cows. I went down to the exhibition an' I spent so much time in that Child Welfare Department that I had only a little while to look at the live stock. An' when I went out, to see if I seen them children in the model playground, an' I just had to go over an' see 'em drill an' look at the work they was doin'—an' the kindergarten, too. An' then it was time to come away. I'll go agin to see the live stock, an' the dogs, but when I'm talkin' to the fattest most of the cows an' horses—about what they've found out in St. John about the babies an' the little boys, I'm glad I lived to see the day when the politicians an' farmers an' all the rest of 'em seen the light an' figured out how much a healthy baby is worth to the country. I don't know when Doctor Roberts was plannin' that Child Welfare place whether he could picture in his own mind just how it was agin' to look an' how it 'ud take hold of people—but any woman that sees it won't forget it. Why, I could hardly drag Hiram away from it." "The ladies in charge," said the reporter, "are most engaging, aren't they, grandpa?" "But Hiram was calmly contemplating the ceiling."

USE AIRPLANES TO TAKE SALMON EGGS UP FRASER RIVER

Ottawa, Ont., Sept. 8.—Another use for the airplane is predicted by Mr. W. A. Found, superintendent of fisheries, in carrying the impregnated eggs of salmon to the upper reaches of the Fraser River. If by this means hatching on an extensive scale can begin along the upper reaches of the Fraser River as well as in the lower reaches, the catch from year to year can be expected to increase greatly, as salmon always return when full grown, to spawn in the river where they were hatched. Any development of this kind would avoid the signing of the treaty between Canada and the United States with regard to the catching of these fish. The treaty is now in Washington awaiting signature.

It is noteworthy that the Portsmouth conference has thus far avoided any reference to the miners' strike. The larger accepted explanation of this is that the conference is divided on the advisability of the strike.
