LIKE ELECTRIC BUTTONS ON TOES

Tells Why a Corn is So Painful and Says Cutting Makes Them Grow.

Press an electric button and you form a contact with a live wire which rings the bell. When your shoes press against your corn it pushes its sharp roots down upon a sensitive nerve and you get a shock of pain.

Instead of trimming your corns, which merely makes them grow, just step into any drug store and ask for a quarter of an ounce of frezone. This will cost very little but is sufficient to remove every hard or soft corn or callus from one's feet. A few drops applied directly upon a tender, aching corn stops the soreness instantly, and soon the corn shrivels up so it lifts right out, root and all, without pain. This drug is harmless and never inflames or even irritates the surrounding tissue or skin.

How to Keep Age-Lines and Wrinkles Away

Don't forget that the woman who smiles will have a skin more free from wrinkles than the woman who frowns. When wrinkles begin to appear it is a good plan to bathe the face once a day for a while in a harmless solution made by dissolving an ounce of powdered sassafras in a half pint of witch hazel.

This is remarkably effective in erasing the hateful lines, not only because of its astringent action which tightens the skin and thus iron out the lines, but also because of a helpful tonic effect which improves capillary circulation and nerve tone. There is nothing better for flabby cheeks or chin. Be sure to ask the druggist for the powdered sassafras.
