City Engineer Peters has gone over the soundings taken by O. P. R. engineers and estimates that about 20,000 yards of dredging, instead of 33,000, is necessary to clean up No. s. 1, 2, 3 and 4 berths.

The C. P. R. figures were based on a distance or 120 feet from the wharf all around and upon an estimated depth of 32 feet. The city engineer's calculations are estimated for a depth of 31 feet and make allowances for the fact that one-third of the distance out from Nos. 2, 3 and 4 berths is included in Mr. Mayes' present contract. The dredging the city will do is 120 out from No. 1 and 80 feet out from the other three berths.

These figures will be placed before to the total committee today.

On Wednesday evening the members of the care and Labor Congress, which is now in session in Glace Bay, will visit this city to proceed towards the establishment of a union in the building trades here.
