## A COCKSHUTT DRILL Means Bigger and Better Crops

You sow with certainty when you seed with a COCKSHUTT Drill. The certainty of having given your seed the best possible chance to produce good crops.

### Your Time—Your Seed—Your Soil Demand a Dependable Drill

From these three things—your time, your seed and your soil—must the whole season's profits come. So that the quick and proper placing of the seed in the soil is a big step toward bumper crops.

With the COCKSHUTT Drill, you put every seed in its proper place—in the centre of a specially-prepared channel.

You plant each seed at the right depth for quick germination—at

a uniform depth for even growth and well-shaded land.

You sow all seed at a steady speed, insuring close-set, compact crops. And you sow more rows per acre than is possible with many other drills. The discs on the COCKSHUTT are a full inch closer than on most other types. This means as much as three to five extra bushels per acre. Enough to pay for a COCKSHUTT Drill in one or two seasons.

### See This Drill At Your Dealer's Or Write For Our Special Drill Book

Visit the nearest COCKSHUTT Dealer or Branch. You'll see a Drill that is making and saving money for thousands of Canadian farmers yearly. Write for our Special Drill Book. A post card request brings it free.
