

to bulk of the highest class, and their first calves will be extremely well bred. All care of course, tuberculin tested by inspectors of the Health and Animal Division, and all are believed to be sound and richly mated.

Some idea of the class of this consignment may be had from the fact that in the Dairy Pouch, Franco Horns, Aggie Mercedes, Daphne Canary Queens and many other good cows, are crossed. One after grass, one dam and sire's dam with over 100 lbs per day, and one is bred to a bull whose sire's dam also produced over 100 lbs per day. Several are prize winners in the dairy tests at Guelph and Ottawa Winter Shows. It is to be noted that no pains have been spared by the Queen's Committee to make this consignment as thick with most of the wants of all the prospective purchasers in British Columbia, and the results of this experiment in cooperative marketing will be awaited with interest.
