

Produce More Feed—Sow CANADIAN ALBOTREA CLOVER

The Best of all the Sweet Clovers

When other clovers fail, it succeeds. When common clovers are winter killed, it lives. When they are heaved out by the frost, it stays; and when they give their maximum yield, it doubles them. Live stock like it better, thrive upon it better, and their condition will show it. At the same time it is the greatest nitrogen gatherer of all the legume plants; the greatest agency for fertilizing and mellowing the soil and for choking out and eradicating noxious weeds.

CANADIAN ALBOTREA

has been grown as a domesticated crop for years. It has been improved by selection, and its merits fully tested by experience. There is only a limited quantity of seed available, so write us early for descriptive pamphlet and full particulars.
