

Bog Spavin

Cure the lameness and remove the blemish without scarring the leg—have the part looking just as it did before the blemish came.

Fleming's Spavin Cure (Liquid) is a special remedy for soft and semi-solid blemishes—Bog Spavin, Thoroughpin, Splint, Ours, Capped Hock, etc. It is neither a liniment nor a simple blister, but a remedy unlike any other—doesn't irritate and can't be mistaken. Easy to use, only a little required, and your money back if it ever fails.

Fleming's Vest-Pocket Veterinary Adviser describes and illustrates all kinds of blemishes, and gives you the information you want to have before ordering or buying any kind of a remedy. **Mailed free if you write.**

FLEMING BROS., Chemists,
75 Ontario Street, Toronto, Ontario

FAIRVIEW offers you another son of the great **Pontiac Korndyke**, who has more high-testing daughters in **Advanced Registry** than any other living bull. We have four of his daughters that have seven days' records that average over 28 lbs. each, and over 4% fat. This young bull was born Nov. 2, 1907, is two-thirds white, and a beauty. His dam is sired by a son of De Kol 2nd's Paul De Kol, the sire of Aagrie Cornucopia Pauline. You cannot find better breeding than this. First check for \$150 takes him.

E. N. DOLLAR, Havelton, St. Lawrence Co., N. Y.
Near Prescott, Ont.

Spring Brook Holsteins and Tamworths. 32 choice young Tamworths from imp. sows, and sired by imp. Knowle King David, of best British blood and Royal winners. Correct type. Holsteins of best strains. Write for what you want, or, better, come and see. Will not exhibit this year. Stock better than ever. **A. C. HALLMAN, Breslau, Waterloo Co., Ont.**

MAPLE GLEN HOLSTEINS For Sale: Service bull, brother to Guelph dairy test champion, 1907; three bull calves, one from 22½-lb. cow, one from 17.80-lb. 4-year-old, a Top Notcher from 19.48-lb. 2-year-old. Come and inspect the herd.

G. A. GILROY, Glen Buell, Ont.

LYNDALE HOLSTEINS! Bull calves out of cows with records of from 18 to 20 lbs., also three heifers coming two, and a number of young cows in Record of Merit, bred to a grandson of Pietertje Hengerveld's Count De Kol. **BROWN BROS., LYN, Ont.**

Homestead Holsteins Bull calves for sale 2 months old, out of cows with large A. R. O. records, and sired by Count Mercena Posch, whose dam and sire's dam average 25½ lbs. butter in seven days.

G. & F. GRIFFIN, Box 43, Burgessville, Ont.

In a graveyard tombstone, in Cheshire, England, is the pathetic story of the sad taking off of poor Martha Snell:

"Poor Martha Snell, her's gone away.
Her would if she could, but her couldn't stay;
Her'd two sore legs and a baddish cough,
But it was her legs that carried her off."

QUESTIONS AND ANSWERS. Miscellaneous.

CROSS OF LEGHORN AND MINORCA.

I would be much obliged if you or any reader will tell me what cross I might expect to result by breeding Single-comb White Leghorn pullets to Rose-comb Black Minorca cockerels. I am not particular as to whether I get rose or single comb, though I prefer the former. Would I get:

1. Black and white chicks, and unevenly marked?
2. Would the chicks develop to Minorca size?
3. Would the eggs from such cross be as large as from Minorca-bred?

H. F.

Ans.—The way to ascertain the information desired is to try the experiment. Possibly some reader has done so, and will give us the benefit of his experience.

CLOVER SEED—BUCKWHEAT—CANNING TOMATOES—KILLING WILD OATS.

1. I have five acres clover which I intend saving for seed. Would you kindly tell me, through the columns of "The Farmer's Advocate," how to handle it, as I have never tried to save clover for seed before? Also give me probable yield per acre.
 2. Kindly tell me how buckwheat compares with peas in feeding value; firstly as a growing ration for pigs, and secondly, as a finishing ration. Also give me an idea of the average yield of buckwheat, as well as the best time to sow, and probable date of harvesting.
 3. Give me the best method for canning tomatoes.
 4. Do you consider gang plowing an aid in killing wild oats, or do you think cultivating with spring-tooth cultivator immediately after harvest as good as gang plowing lightly?
- I might say that I consider your "Questions and Answers" department one of the most valuable features of your paper.

SATISFIED SUBSCRIBER.

Ans.—1. Attach a light platform to the back of mower bar, which will drag on the ground, and from which the clover can be raked in bunches out of the way of drive wheels the next round. In ordinary weather simply leave the bunches until fit to haul. Clover seed yields from one to six bushels per acre.

2. Ground buckwheat is a valuable food for pigs in both the growing and finishing periods. Experiments show that its feeding value per 100 lbs. is 75 to 80 per cent. of that of peas. For best results it should not be fed alone, but in conjunction with other grains. Buckwheat will sometimes yield as high as forty bushels per acre, but as a crop it is rather uncertain. It has to run the risk of summer drouth and early fall frosts. It can be sown any time during June, and it never really all ripens, bloom continuing until frost cuts it down. It is usually harvested when seed from the first full bloom is ripe.

3. One housewife who has unvarying success in canning tomatoes, says there is no secret about it. She is particular about thoroughly cleaning jars, using soda in the water, and also to have good rubber rings. It is well, also, in addition to cleansing the jars, to sterilize them. The rubber rings may be dipped in hot water, but the jars themselves, with both glass and tin tops, should be immersed in cold water, which is then brought to a boil. Tomatoes are first scalded and peeled, then boiled for ten minutes and at once put into the self-sealers and lids screwed on. No chemical, nor even salt, is used. Set in a cool, dark place.

4. If you can, by cultivation, get wild oats to sprout in the fall, let us know, as some who have tried it say that it cannot be done. As between thorough cultivation with spring-tooth cultivator or shallow gang plowing, there would not be much choice.

T.

No man should finally commit himself to a radical change in his business without carefully considering results before hand.

HOLSTEINS

We must sell at least 25 cows and heifers at once in order to make room for the increase of our large herd. This is a chance of a lifetime to buy good cattle at bargain prices. The best way: arrange to come and look the herd over. If you cannot, we will do our best for you by correspondence. Also a few young bulls. 100 head to select from. Imported **Pontiac Hermes**, son of Hengerveld De Kol, world's greatest sire, head of herd. All leading breeds represented.

Putnam station, near Ingersoll.

H. E. GEORGE, Crampton, Ont.
