... PROSPECTUS ...

The Salmo Consolidated Gold Mining & Development Company is not a company of promoters. The four valuable claims comprising its properties have been bought and paid for in stock of the company. A small block of the stock is offered for the purpose of developing them. This stock, called Treasury Stock, is on on exact par with the rest of the stock.

From the product of its sales no money has to be paid out to promoters or directors. All of it will be expended, as it comes in, in actual development work, every share sold thus improving the property and raising the value of the stock. A careful and conservative estimate of the value of the properties today, puts the price per share at 7½ cents. A limited number are placed upon the market at this price. By the time these are disposed of—probably before—the work now being done will have fully demonstrated the richness of the ore bodies already so well defined on the properties, and the price of

PROMOTER COMPANIES invariably seek high-sounding names for their directorate, to attract attention to their enterprises and detract careful consideration form their actual merits as substantial channels for investment. Names of leading men, who are never asked to put a dollar into the enterprise are often borrowed for such purposes. This, on the arrived when those put a donar into the enterprise are often borrowed for such purposes. This, on the edge of the country should give to the world corps, and it seemed that at length the Uitland-ers meant business. Positions of vantage were of the earth, and paid without regard to contrary is a company of practical mining men of well-known repute; each equally interested with the investor—not in the

ers meant business. Positions of vantage were secured around town and forts erected and pro-race, or creed, or party prejudice, the mere sale of the stock, but in the development of the properties acquired to their fullest dividend paying capacity. Being practical men, they went to work in a practical manner, and first proved to themselves, that the properties afforded a good basis for their investment. Then work was begun in earnest, and at every foot of depth obtained their expectations were more than realized. When only six feet down the men were working in a solid body of galena ore, which had gradually widened from about four inches to two feet two inches, and at that depth was clear and free from any formation. Particulars of this, and of the assays made, will be found in the following description. Since then, as many men as can work in the shaft, have been sinking with all their might, night and day, and this rich ore is accumulating on the dump ready for shipment. Then and not till then, was it decided to seek the assistance of outside capital in the speedy and com-Before the presidential party left the plete development of these properties of proven value, and the company does so with an easy confidence that its stock will soon be selling at substantial figures.

ORGANIZATION .- The Salmo Consolidated Gold Mining and Development Company, (Limited Liability,) was incorporated on the 23d day of February, 1897, under the laws of the Province of British Columbia.

CAPITALIZATION.-The capital of the company is one million five hundred thousand dollars (\$1,500,000), divided into one million five hundred thousand (1,500,000) shares of a par value of one dollar (\$1) each, fully paid and non-assessable; of which five hundred thousand (500,000) shares are set apart as Treasury or Development Stock to be used solely

PROPERTIES .- The properties of the company consist of a group of four full claims known as the White Cloud, Blue ly known how many were killed on either side, minocks. This somere background was but it is estimated the numbers were about even. formed by thousands of spectators, who Jack, Yellow Jack and Sitting Bull mineral claims, all contiguous to one another and situate on the north side of Sheep Jameson and his officers have since paid the penalty for their error, and the most charitable the ground on both sides of the tomb to railroad. No one who has followed the recent developments of the Salmon River District, can longer have any doubt that this call it a mistake. The News in Johannesburg. When intelligence reached town that Jameson and his troopers were prisoners, excitement

to compare the condition of the country II years ago with what it is today, one wonders how any government could be so blind to its own interests as to pursue the policy the Transvaal adopted. A chivalrous foe, the British, through call it a mistake.

Mr. Gladstone had two years previously decided that the Boer war was a mistake, had abandoned further hostilities, and left the country to them, contenting themselves with a suzerainty over it.

After a couple of years at government experi-menting, the Boers were again considering the advisability of giving the country over to Britain. Luck, however, changed their plans. A pros-pector, named Wemmer accidentally struck a

nized as citizens. They must be 18 years of age previous to registering, and then undergo 15 years taxpaying before voting for the second Volkesraad (parliament) and are never entitled to vote for president. Moreover, they are ex-cluded from municipal government. There is a sanitary board at Johannesburg, but it possesses and why they did not send at all hazards, a sanitary board at Johannesburg, but it possesses merely nominal power. Everything has to be referred to the capital, Pretoria, and more often than not its suggestions are ridiculed. For in-stance, only the other week, a vote of $\pounds 3,000$ for a house to house postal delivery for a city of over too,000 inhabitants was negatived as a waste of money and that too by a covernment whose money, and that too by a government whose revenue is almost solely derived from Witwater-
