TO STUDY SOCIAL PROBLEMS.

Leaves Firm of J. P. Morgan in Effort to Solve Old Question. New York, Dec. 13.—George W. Perkins announced today his retirement from the firm of J. P. Morgan & Co. to devote his time to extending the benefit of profit-sharing and other principles for solving the conflict between capital and labor.

"On January 1, I will have been with the firm of J. P. Morgan & Co. ten years, and engaged in business activities over thirty years. I am withdrawing to devote more time to corporation work and work of a public nature in which I am deeply interested. In continuing my relations with the industrial and other business organizations with which I am connected, I hope to find further opportunity for extending the principles which science has shown offer a practical solution of some of the difficulties existing between capital and labor."

"At Columbia University two years ago, and at Harvard University last spring, I spoke of the importance of solving the new problems at present facing the country, and which have followed the organization of the great cooperative combinations of capital, and it is my hope that the experience I have had may enable me to contribute something towards the adjustment of those matters, which seem to me to be of the largest consequence to the country."

In recent years Mr. Perkins has represented the firm in the great industrial organizations in which they are interested, and the formal announcement of the firm indicates that his relations to those concerns will continue.

TALK OF TARIFF

Speculation as to Whether U. S. Congress Will Make Changes. Washington, D.C., Dec. 13.—A single week of congress has not cleared the air as to whether there will be a serious effort at the present session toward tariff tinkering. While many bills have been introduced in the House for the repeal of the duties on lumber, food products, coal, iron and raw materials, they have come entirely from the Democratic side and are regarded as indicating the intentions of individuals next session when the Democrats will be in the majority in the House.

In the Senate the only tariff activity has been in connection with the proposed amendment of the rules presented by Senator Cummins. The change suggested is designed to permit revision of the tariff by schedules and prevent consideration of amendments to schedules other than those specifically under discussion. The rules insist that it involves closure in a form that has a human nature to the senate rules for a hundred years. Friends of Cummins' scheme point to President Taft's endorsement of tariff revision by schedule and declare that such a rule is necessary if the president's plan is to carry.

STRIKE ULTIMATUM

Railway Engineers on Lines Radiating From Chicago Take Action. Chicago, Ill., Dec. 13.—The Brotherhood of Railway Engineers will present its strike ultimatum to the Railway Managers' Association Monday, backed by the approval of more than 95 per cent of the 33,000 engineers who are members, according to Warren S. Stone, president of the brotherhood. The last group of returns on the strike vote were counted today, and the strike sentiment was stronger than he had expected. After months of negotiations, the demands of engineers are now 75 per cent of the present wage scale higher than the railway managers are willing to grant. Monday, according to Mr. Stone, the result of the recent strike vote will be shown the railway managers and the ultimatum delivered. If it will be not acceded to, a strike that will close the throttle of every railway locomotive west, south and north of Chicago, may be called within five hours, it was intimated.

Thrown On Saw. Holland, Min., Dec. 13.—Just after noon Wilhelm Thomas, aged 21, second son of Joseph Thomas, a farmer, four miles east of here, met death by falling on a circular saw. While taking down logs to feed the saw, the pile toppled over and carried his body on the saw, which cut into his chest. Death was instantaneous.
