Pumpkin Pie; Seven Kinds

-To make four large ples take two 1-To make four large pies take two quarts of stewed, mashed pumpkins and mix it with one quart of rich milk, six eggs beaten together, one and one-half cuns of light brown sugar, one tadespoonful of all-apice, one teaspoonful of salt, one-half teaspoonsful of ginger, one-half of nut-mez, grated, and the fuce of one framon. Seat together thoroughly. Pour it into the four crusts and bake in a moderate even. Be sure to have all ingredients for the pic crust as old as possible before the for the pic crust as old as possible before freen it out.

reans it out.

2-To make one pie rub through a sieve cocked pumpkin enough to make two cupfuls. To this add a small cup of sugar, a salispoon of sait, one teaspoon of cinhamon and one of ginger and a pint of bot milk. Mix throughly, When cold site in two well beaten eggs and fill a ple plate which has been lined with good rich peate. It will require three-quarters of an hour to bake.

3-Steam and strain, through a require.

saste which has been lined with good rich poste. It will require three-quarters of an hour to bake.

3-Steam and strain through enough pumpkin to make one and one-half cups. To it put two-thirds of a cup of brown sugar, one teaspoon of ginger, one-half teaspoon of ginger, one-half teaspoon of ginger, one-half teaspoon of ginger, one-half teaspoonful of sait, two eggs, one and one-half cups of milk and a half cup of cream. Mix ingredients in order give and bake.

4-Make the pie crust and roll thin. Issue a deep pie dish. With a pint of stewed pumpkin and a tablespoonful of melted butter stir in two well-beaten owns, a half cupful of sugar and one-half teaspoonful of ground ginger and smel-half pint of milk. Pour into a crust and bake.

5-The first ingredient for this pie is a cup and a half of pumpkin which has been made very dry. Add to it two cups of milk, one beaten egg, a large half-cup of brown sugar, a toaspoonful of olinamon and half a teaspoonful of olinamon and half a teaspoonful each of sait and ginger? Line the pie tin will pastry, fill with the mixture and bake in a stow oven until it is brown on the top.

5-Add the beaten yolks of four eggs and one-soughtil of whith sugar to two cupfuls of pumpkin which has been put through a colander. With this mix a quart of milk, one teaspoonful of cinnamon, mace and nutmeg, mixed, and the whites of the eggs, beaten stiff. Line a very deep bid dish with a good paste. Cut siashes in it here and there. Stir the pumpkin custard well from the bottom and put it into the pastry. Bake in a stendy own.

th into the pastry. Dase in a strained oven.

T—Into a quart of stewed and strained pumpkin stir a quart of granulated sugar, cinamon and nutmeg to taste, and, last of all, five oggs, well beaten. Mix thoroughly and pour the mixture into a deep pie plate lined with puff paste. Bake in a good oven until the pumpkin custart is set. Eat cold, Canned pumpkin is used in the same way and is almost as good as the fresh.

NEWEST FAD IN FACE WASHING.

(By a Physician) (By a Physician)
Some things are so simple no one ever bothers with them.
The new way a few of the beauty-seeking girls have been face-washing lately is one of these. This fad which is quite sensible enough to be a fashion is washing with ICE.

A clear skin depends on a good circulation. But in spite of the various

with ICE! depends on a good cir-dear skin depends on a good cir-on. But in spite of the various y lotions and beauty talks and y systems, few women ever do any much to bring their own natural to their faces, ice acts on the blood, quickening irculation and shows its effect on kin.

the circulation and shows its effect on the skin.

This little plan may be just what is needed to make your face wear that bright color which you so much envy in the face of your friend.

Each morning, after taking a little ten-minute exercise to wake you up, set a small place of ice and wash your face with it. Go over every part of face and neck until the ice is entirely used. As the ice, to begin with, should be about half the size of your fist, you will see that the chilling will be pretty thorough. When the ice is melted, rub the face briskly with a Turkish towel until it is quite dry.

gnite dry.

For a few minutes the face is red like a froat bitten apple, then that fades away into a nice color.

The ice not only helps the circulation but it acts as a tonic on the muscles.

It takes away that distressing sagging of the face which is likely to follow a long period of hot weather.

If you have been obliged to spend the summer in the city try a bit of ice, out of the refrigerator, instead of an expensive face tonic which may do more harm than good.

TIME CURES ALL THINGS. (New York Herald.)

In the days when Mr. Lincoln was practicing law he was not overcareful of his dress. This was partly due to scarcity of funds, and it was sometimes morths before he could purchase a new suit of clothes.

A friend encountered him leaving a clothing store with a new coat on. "Got a new coat, Abe?" he asked after the greetings.

'Yes," said Mr. Lincoln; "it appears go,"

go."
"But it's a little short, isn't it?" asked the friend,
"Yes, perhaps it is," said Lincoln; "but it will be long enough before I get another one."

(Exchange.).

(Exchange.).

(It were a mitster's wife.) said the lady to the car, who was taiking too loud not to be overneard, "you may rest assured I should take an interest—an active interest—in any lustoand's work. I should say to him; Richard, if you want to draw them to this church, that church, and the other, preach short! Always preach short! Always preach short! Always preach short! Always preach short! Sure and the stone, and condense, and condense, and then have an air about you as if time were word something and you could not afford to best a minute of it. If on a Sunday morning he seemed to be in an extra anniable mood, I would venture to say, 'Itchard, dear, don't be all day in giving out your notices.' Don't blink over them and clear your threat, and go poking along through them as if you had never seen them before and were pondering them in your mind as you call attention to them! Straight forward, and then say them all over again backward! There is nothing so tiresome!' I am not sure but some Sunday I should say, 'Richard, 'read them siraight forward, and then say them all over again backward! There is nothing so tiresome!' I am not sure but some Sunday I should say, 'Richard, 'read them sure but some sunday I should say, 'Richard, if you get the least mite tedious to-day I shall fuss with my bonnet-string as a warning! And when you say 'In conclusion,' don't for pity's sake go on until you reach a "Finally," and after that 'One word more,' or 'Just another thought.' I do think it is such a mistake to try to tell all one knows in one sermon."

Just then the auditor was obliged to leave the care but he could not help exclaiming to himself, 'What a sensible woman." It is to be hoped that yound minister.—Selected.

UNIFORMITY IN CANADIAN DAIRY PRODUCTS.

A few month sago there was held at Ottawa a conference of dairy experts and officials from all parts of the Dominion. meeting was called by the Minister of Agriculture for the purpose of endes oring to perpetuate the uniformity of the quality and character of Canadian cheese oring to perpetuate the uniformity of the quality and character of Canadian cheese and butter that has been responsible for the success of Canadian dairying. As pointed out by the Dairy and Cold Storage Commissioner, who presided over the Conference, many things come up in the practice of dairying over which slight differences of opinion may arise, so that it seems desirable to bring together from time to time those in charge of dairy schools, and the chief instructors, in the various Provinces, to discuss methods and practices, in order to arrive at some agreement as a body of dairy advisors. The Conference lasted two days, during which time many matters of importance were taken up and freely discussed. Som of these were the pasteurization of whey, factory refuse in relation to tuberculosis in hogs, testing and grading cream at cream gathering ceamerles, whey butter, methods of paying patrons of cheese factories, and other subjects relating to the production of butter and cheese. For the information of butter and cheese makers, and others interested in dairying, there has been printed a verbatim report of the proceedings of this Conference. Copies may be procured by applying to the Publications Branch of the Department of Agriculture at Ottawa.

AN ELECTRIC SWINDLE.

The Electrical World states that a man has recently been making the rounds of Southern Indiana reaping a good harvest by selling an attachment to electric light circuits, which re represented would give a saving of 25 per cent, on light bills when connected between the meter and the lights. He col-lected \$15 in advance from each customer. His so-called machine was an ordin ary 4-inch junction box with two wires passing straight through it, the box bepassing straight through ing filled in with cement.

WHAT IS A CARAT?

You have pronably often heard of the rord carat applied to lewelly an such hings, but perhaps you do ot know that had an entirely different meaning when is used for a ring and for a diamond a the ring.

The jeweller tells you that the ring or our watch case is 18 carat gold and you

Your watch case is 18 carat gold and you have an idea shat it must be preity good, as you have never beard of any that cas over 20 or 22. What the jeweller cans is that eighteen twenty-fourths of he ring is pure gold and the rest is come.

the ring is pure gold and the rest is coner.

Fure gold is 24 carats fine and world he too soft for everyday use, so it is mixed with an alley to make it harder. The best alley known for this purpose is copper, as it interferes very little with the color of the gold.

If a ring is only 14 carat that means that nearly half of it is repper, and meny that are sold for that are not eve 14 catats. In Fingland all such rings ore stammed to show exactly what they are. But when we come to the diamond in the ring and the jeweller tells us that it is two carats or one and a half he does not nefer to the pureness of the sione at all as he gold, because a carat is a weight when snoker of in connection with a diamond. Preclous stokes are weighed by Troy weight, which runs 500 grains to the onne weight, which runs to grains to the onnes and a carat is only about three and one fifth grains.
