THE PERFECT LIFE.

Students of University Attended
Free Baptist Church.

Rev. Mr. Hartley Preached to
the Graduating Class.

The Perfect Life Subject of the Sermon—An Interesting Service.

The students of the U. N. B. attended divine services in a body on Sunday morning, going to the Free Baptist Church and occupying the front seats in the centre of the church. Chancellor Harrison and Prof. Scott accompanied the students. The pastor, Rev. F. Clark Hartley, preached a sermon especially of the graduating class. Rev. F. Clark Hartley, of Acadia, occupied a seat beside the pastor and took part in the service.

The service began with singing that old and favorite hymn of praise: "When all thy mercies, O my God! My rising soul surveys, Transported with the view, I'm lost in wonder, love and praise." The scripture lesson, 2nd Cor. 1X, was read by Rev. Dr. Kierstead. Followed by prayer, offered by Dr. Kierstead. While the offering was being taken up the choir, under the leadership of Mr. M. Tennant, rendered the anthem, "Lift up your heads, O ye gates. The choir was accompanied by the organ, presided over by Miss Atherton, and violin played by Mr. Nichol.

An old testament lesson, Ps. 1, was read by Rev. Mr. Hartley, followed by singing of another hymn.

The Perfect Life.

Pastor Hartley selected for his text Rev. XXI., 16—"The length and the breadth and the height of it are equal." He said his subject was The Perfect Life.

The text is a part of St. John's description of the New Jerusalem. One of the perfections of this city was its symmetry. As that city was symmetrical in all its parts so must the perfect life be. If we would strive after the perfect life not only length of days must be desired but breadth and height of life as well.

The world has no more beautiful picture to show us than a young man or woman just starting out in life. The perfect, fully rounded life has the three sided development illustrated in the text.

The Length of Life.

In that life which approaches the nearest to the ideal a time when the young person says, "Here is my life work; this is my calling. His best, his inclination, his talent lies along that line. Through every life there runs a sharply defined, tense, straight line. That is length of life. No man finds less tolerance today than the aimless man. Young people should find their life work, and stick to it until its completion has been reached. Have a purpose in life and stick to that purpose.

The Breadth of Life.

There is breadth to a man's life as well as length of days. When a man has length and breadth together then we feel that we have a strong man. The man whom the world delights to honor is he who having found his own life work reaches out to help his fellow men. One of the best illustrations of the fully rounded life was that of the late Mr. Randolph. His life reached out in all directions and helped every man with whom it came in contact. If we would add breadth to the length of our lives we must reach out to the generation in which we are placed.

The Height Thereof.

The height of a man's life is its reach upward to a power he recognizes as above and supreme to himself. If a life is to be symmetrical its reaching up to God must be equal with its length and breadth. This is the life he would have young people see and strive for. When a young man once sees the life touched by the Divine he cannot thereafter be contented with common things. The sermon closed with a forceful exhortation to the students to strive after the symmetrical, fully rounded, cubical life.

Mrs. Helen Blackmer rendered a beautiful vocal solo, with which she was obliged to Mr. Nichol, after which the service closed with singing and benediction pronounced by Rev. Dr. Kierstead.

LORD PAUNCEFOTE DEAD.

The British Ambassador at Washington Passes Away—A State Funeral.

WASHINGTON, May 24.—Lord Pauncefote, the British ambassador, died at 5 o'clock this morning. About 2 o'clock he suddenly developed a very weakened heart condition and a consultation of his physicians was called. They were unable to rally him and he died peacefully, not having regained consciousness from the sleep he fell in to during the night.

Rev. Hon. Sir Julian Pauncefote, T. C. G. C. B., G. C. M. G., K. B., was born in 1828. He was a son of the late Robert Pauncefote of Preston Court, Gloucestershire, and was educated at Paris, Geneva and Marlborough College. He was made a barrister of the Inner Temple in 1852; became private secretary to the late Sir William Molesworth, secretary of state for the colonies; practised at the Hong Kong bar for several years, was attorney-general of Hong Kong in 1890, chief justice of the Leeward Islands in 1874; assistant under secretary of state for colonies, 1874; assistant under secretary of state, 1876; permanent under secretary of state, foreign affairs, 1882; delegate for drawing up an act relative to navigation of St. Lawrence, 1885; envoy extraordinary and minister plenipotentiary to the United States since 1893.

It is an unfortunate thing that consumption in its early stages is so hard to detect, otherwise it might be easily averted. There is one very common disorder, however, that is frequently a symptom of incipient consumption, viz., bad digestion. A remedy that will correct this disorder should avert consumption. Certainly Park's Perfect Emulsion, which kills consumption germs, will.

LUMBER HUNG UP.

About 30,000,000 Feet Stranded on the Upper St. John Waters.

Rise of Couple Feet of Water Would Bring Most of Logs Down

John Kilburn Home From His Drive—Situation on Headwaters.

Thirty million feet of logs are hung up on the Upper St. John, and will need copious rains to bring them down this season. John Kilburn returned on Saturday night from the scene of his lumbering operations. The tail end of his drive is nine miles above Seven Islands, and forty five or fifty miles above corporation limits. There are about five millions in this drive and Kilburn has another five million in the drive of Noble and Belanger further down and hung up as well. Kilburn left thirty men on the drive and has them hired for a month, and hopes that there will yet be a sufficient rise of water to bring the lumber out. He is considerably further down river than when he abandoned his drive a year ago and is in a much better position to take advantage of any rise of water. Mr. Kilburn says that this has been the coldest and most backward spring he has experienced since he has been in the lumbering business. He expects to return to the upper St. John next week, or sooner if there should be rain. Mr. Kilburn left his drive on Thursday last, coming down river from the drive of Edmundston in a boat, and taking the train at the latter place.

Other Lumber Hung Up.

Between Kilburn's drive and the corporation limits some twenty five millions of lumber is stranded. W. J. Noble is hung at Friendly Rapids, nine miles below Seven Islands, with 6,000,000 for Cushing and 3,000,000 for Dickey, the latter to be saved at Port Kent. Noble was at Edmundston last week and returned to his drive on Thursday with a crew of men and will stick to the drive for a while yet, with the hope that rain may come in sufficient quantity to make a rise of a couple of feet of water, which would bring the lumber down. Noble's gun and also those of Kilburn are at work sacking the logs from the shores to the head of the stream.

Belanger, who operates for Cushing, has 6,000,000 feet in the same place as Noble's and is in a similar position.

Clanquand is stuck at Willet's Bar, only six miles above the corporation limits. He has between 4,000,000 and 5,000,000 for W. H. Murray.

Kilburn and Noble between them have a million and a half for the Dehnes, this being mixed in with their logs.

Silo Dickey is hung up on the Al legh with 3,000,000 for Stetson. Thos. Clair is high and dry on Little Black river with the tail end of his drive for Stetson. He has brought out between 5,000,000 and 6,000,000 and is hung up with 1,500,000.

BILIOUS DYSPEPSIA.

A Dreadful Complaint Accompanied by Headache, Sickness of the Stomach, Vomiting, That Can Be Permanently and Quickly Cured by Ferrozone.

Some persons have attacks of bilious dyspepsia very frequently, and feel as if they were about to die. The whole system seems to collapse. The tongue becomes coated, the face a sallow pallor, and a bitter taste is always noticeable in the mouth. At times the bowels are very constipated, and on occasions acute diarrhoea is caused by the accumulation of bile in the system.

It is highly dangerous to let such a condition persist. It must be cured, and the simplest and surest remedy is Ferrozone. It digests every particle of food eaten, and prevents the waste products from clogging up the system. Ferrozone restores all deranged organs to a healthy, vigorous condition. It keeps the bowels well regulated, makes the kidneys eliminate all poisons from the blood, and supplies the necessary elements to build up and strengthen the entire body.

Mr. Louis Mehan, one of Peterborough's most enterprising and well known business men, during the past three years was an unceasing sufferer from bilious dyspepsia. He was cured permanently by Ferrozone. He was so anxious that others may profit by his experience that he gives the following testimonial.

"I have three years ago," says Mr. Mehan, "I had the grippe, which left me in a very run down condition that finally developed into dyspepsia. I was unable to eat but a few things and had a craving for acid. I gave up treating with the doctors because they did not help me, and on the advice of a friend used Ferrozone. It not only cured me of dyspepsia and biliousness, but has built up my strength to what it was before I had the grippe. I can recommend Ferrozone as an ideal restorative."

Ferrozone is capable of digesting all classes of food, and contains in a highly concentrated form the elements necessary for strengthening and reconstructing and nourishing the stomach and other digestive organs. It is a builder of blood, muscle and fat, and makes sickly, weak and disheartened people strong and well. Ferrozone gives you force, energy, vim and spirit and cures every time. Sold by all druggists. Price 50c. per box or three boxes for \$1.25. By mail from N. C. Polson & Co., Kingston, Ont.

NEW HARNESS SHOP.

I have opened a Harness Shop on Phoenix Square where I will keep in stock and manufacture harness of every description.

Repairing a Specialty.

I was in the employ of the late J. D. Macpherson for 15 years and need no introduction to the public.

AGENT BUTTERICK AND DELINEATOR FASHIONS.

UNQUESTIONABLE PROOF

Of the Every-Day Superiority of

THE IMPROVED U. S. SEPARATOR.

The kind that

Gets All the Cream.

PROF. W. J. SPILLMAN, of the Washington State Experiment Station at Pullman, in an article in the Larch and Range, Seattle, Wash., of August 13, 1901, gives the record of the testing of five samples of milk from dairymen using U. S. Cream Separators. The five tests were as follows:

1.	2.	3.	4.	5.
100	100	100	100	100
100	100	100	100	100

An average of .012 of one per cent. Please notice that in two of the samples the professor could find no fat, and in the poorest one only .08. (Probably this dairymen did not run his separator according to the directions.) These records show that the U. S. Separator is without a peer in thoroughness of separation.

Highest Award at the Pan-American Exposition.

Write for descriptive catalogue giving full information.

Jas. F. VanBuskirk.

Sole Agent, Fredericton, N. B.

For = Ladies = Only.

We have a waiting room, with separate entrance, specially for ladies. While consulting us about their wheel or waiting to have the tires pumped up, ladies can sit down and rest; or they may make engagements to meet friends here. There are toilet conveniences and reading matter and ladies are welcome to make free use of the place.
