

Hot Weather HEADACHES

Tablets, powders, drugs, of any kind will NOT cure headaches. Simply because they never reach the CAUSE of the headache.

What causes headaches? Poisoned blood, always.

If the bowels are constipated—

If the kidneys are weak—

If the millions of pores of the skin are not active—

There are bound to be headaches.

Fruit-A-Tives

ON "FRUIT LIVER TABLETS"

Cure headaches because they cure the cause of headaches. They do not drug the nerves. They go to the root of the trouble, invigorate and strengthen the liver and increase the flow of bile into the bowels, which cure constipation. Act directly on the kidneys, heal all kidney irritation. Act on the skin, stimulate and open the pores.

With bowels, kidneys and skin all healthy and working in harmony, the blood is kept pure and rich and there can be no headaches.

FRUIT-A-TIVES are pure fruit juices—combined by a secret process with tonics and intestinal antiseptics.

See a box or 6 boxes for \$2.50. Sent on receipt of price if your druggist does not handle them.

All accounts and past due notes owing The Miramichi Farm Implement Co. which are unsettled on August 21st next will be placed in Court for collection with costs.

Newcastle, J. 1, 21, 1100

FEEDING CHICKENS FOR MARKET.

Spring chickens usually bring about 7 cents per pound live weight when sold without special preparation. A little feeding will give them an extra market value whether sold alive or dressed, and will pay well for the trouble. There is a good demand this year for a good quality but dealers do not want the poor scrub. Farmers will do well to put their chicks on the market as heavily as he can make a pound of pork or beef, and the difference shows in the price. If you have not customers already, ship only reliable produce merchants. If shipping alive one must allow for considerable shrinkage.

The following extracts from Bulletin No. 7 deal with feeding and preparing poultry for market.

FATTENING CHICKENS IN CRATES.

The fattening crates in use at the illustrations stations are 6 ft. long, 16 in. wide and 20 in. high, inside measurements. Each crate is divided by two tight wooden partitions into three compartments and each compartment holds four chickens. The frame pieces are 2 in. wide, and 7-8 in. thick. The frame is covered with slats, placed lengthwise on three sides,—bottom, back and top,—and up and down in front. The slats for the bottom are 7-8 in. wide, and 5-8 in. thick; the back, top and front slats are the same width, but only 3-8 in. thick. Two inch spaces between the slats in front enable the chickens to eat from the trough. The bottom slats are 1 1/4 in. from the corner piece. The bottom slats are placed on the top of the bottom cross pieces of the frame to prevent the chickens' feet being bruised when the crate is placed on the ground. The top slats are 2 in. apart and the back slats 1 1/2 inch apart and six strips two inches wide are nailed under them. The three doors so framed are hinged to the rear corner piece.

The crates are placed on stands 16 in. from the ground. The droppings are received on sand or other absorbent material. A light "V" trough 2 1/2 in. inside carried on two brackets nailed to the ends of the crate is placed in front of each crate. The bottom of the trough is 4 in. above the floor and the upper inside edge is 2 in. from the crate.

SITUATION OF CRATES.

In warm weather the crates should be placed outdoors in a sheltered position.

In unsettled weather it is advisable to construct a rough board shelter to shed the rain; or the crates might be carried into a shed or barn. During the cold weather the crates should be placed in a warm building. Abundant ventilation is required at all times.

In order to have the chickens plump and "fit for market" at the most profitable age they should be put in the crates when from three to four months old, though suitable market chickens of any age will show gains in the crates.

Select for fattening chickens that are of medium size, of a broad square shape, with short straight legs set well apart, and above all with a good constitution.

EQUIPMENT FOR FATTENING.

It is advisable to use the crates described in Bulletin No. 7. If only a small number are to be fattened, packed boxes of suitable dimensions can be adapted for the purpose. The open top of the box may be made the bottom of the crate and one side should be removed for the front. Laths should be nailed up and down the front and lengthwise of the crate to form the door. The laths are put the same distance apart as recommended in the construction of the fattening crates. A board should be loosened in the top to remove the chickens, and a feed trough arranged in front. A shaping board and shipping boxes are also required.

FATTENING RATIONS.

A satisfactory ration is one that is palatable and that will produce a white flesh. Oats, finely ground or with the coarser hulls sifted out should form the basis of all the grain mixtures. Ground corn fed in excess will result in a yellow flesh of inferior quality; ground peas impart a hardness that is not desirable. Ground oats, buckwheat barley and low grade flour are the most suitable meals.

SATISFACTORY MIXTURES.

1. Ground oats (coarse hulls removed).
2. Siftings from rolled oats, (no hulling dust should be included.)
3. Two parts ground oats, two

parts ground buckwheat, one part ground corn.

4. Equal parts ground oats, ground barley and ground buckwheat.

5. Two parts ground barley, two parts low grade flour, one part wheat bran.

The meal should be mixed to a thin porridge with thick sour skim milk or buttermilk. On the average 10 lbs. of meal require from 15 to 17 lbs. of sour skim milk. A small quantity of salt should be added.

When sufficient skim milk can not be obtained for mixing the mashed, animal and raw vegetable food should be added to the ration.

DURATION OF THE FATTENING.

The chickens should remain in the crates not more than 24 days. Some will fatten more readily than others. These should be picked out a week before finished, and during this last week it is well to feed a little beef tallow, shaved into the trough along with the mash, about 1 lb. tallow per day to 50 or 60 chickens.

KILLING THE LICE.

Before the chickens are placed in the crates they should be well dusted with sulphur to kill the lice. They should be sulphured again 3 days before being killed.

THE FIRST WEEK.

Feed them lightly the first week. A small quantity of food should be fed along the troughs; as this eaten, add more, but not as much as the chickens would consume. They should be fed and the troughs cleaned and turned over 3 times a day. Give them water twice a day and grit 2 or 3 times a week. Balance of the time—The chickens should be given twice a day as much food as they will eat. Half an hour after feeding, the trough should be cleaned and turned over. Water and grit should be supplied as in the first week.

FEATHERING PLUCKING.

Chickens fattening in crates sometimes pluck the feathers from one another. This habit is caused by an irritation at the roots of the feathers resulting from overheated blood or parasites. The remedy is to remove the affected chickens and feed the others more skim milk in their mash, or add animal and vegetable food to the ration. If the trouble is caused by parasites the mites can be found among the white powdery matter at the base of the quill. A sulphur and lard ointment should be applied to the affected parts.

TO TRAIN THE HEN.

Washington, Aug. 31.—The American hen is to be given a course in Luther Burbank school. The Department of Agriculture propose to take her in hand and train her to lay more frequently and cheerfully, and especially to induce her to lay once a day in cold weather. It is found that the besetting sin of the hen is wanting to set. If it wasn't for the distraction of this strange ambition, she would be much more useful. So it is proposed, if possible, to develop a hen that will not want to set, but that will lay all the time, Sundays, of course, excepted.

To this end Secretary Wilson has established under the Bureau of Animal Industry a hen department in charge of Robert R. Slocum, a hen expert. Mr. Slocum will establish a big hen farm near Baltimore where colonies of big hens will be handled by various processes, and a scientific diet and course of treatment worked out. Secretary Wilson explains that the hen produces more annual wealth than the gold and silver mines together, and is entitled to some attention.

"What are you doing, Pat?" asked the inquisitive person, as he observed the son of Erin ascending a ladder with a hod filled with bricks.

"I'm carryin' knock-out drops," replied Pat, as one of the bricks

The Bridesmaid—"You were awfully nervous at the altar, dear."

The Bride—"Yes, I suppose so. George is so timid, you know, and I was afraid he would run away before the minister got through."

Wedding Bells.

CARNAHAN-SHAW.

At the home of Mr. and Mrs. R. L. Carnahan, Upper Derby, on Aug. 28th, the marriage of their youngest daughter, Cynthia J., to Mr. Archibald Shaw took place. The ceremony was performed by the Rev. J. G. A. Colquhoun, and Mrs. Colquhoun played a wedding march as the bridal party entered the room. The bride was charmingly attired in white organdie, with all-over lace and insertion, and carried a shower bouquet. Her travelling dress was steel buttons and silk braid, with hat to match. After the ceremony, dinner was served, and then the bridal party drove to Newcastle, where they took the "Ocean Limited" for their future home at Port Francis, Ont., where the groom holds a responsible position as foreman of the Rainy River Lumber Co. The young couple are very popular, and have the best wishes of their friends for a long and happy married life.

BLACKMORE-PARKS.

An interesting event took place Wednesday Sept. 5th, at 3 P. M. in St. Stephen's church, Redbank, when Miss Jessie, third daughter of Mr. John Parks, was united in marriage to James Blackmore. The church was nicely decorated

ARE YOU TIRED?

Do you feel constantly tired so that everything is done with an effort? It is an indication that the kidneys are not doing their work of filtering the impurities from the blood.

and crowded with guests. The ceremony was performed by Rev. George Mitchell. The bride, who was given away by her father, was beautifully gowned in white organdie, with trimmings of white insertion, and wore a veil and orange blossoms. Miss Edith Parks, sister of the bride, acted as bridesmaid, while Jed Sutherland supported the groom. Miss Hattie Parks was flower girl. After the ceremony the happy couple and guests repaired to the home of the bride, where an elaborate supper was served, and the evening spent in delightful entertainment. The presents were numerous and pretty, and evidenced the high esteem in which the bride was held in Redbank. The friends of the newly wedded couple wish them a happy and prosperous married life.

Young Neurich had scarcely made his debut in society when he found it necessary to decline an invitation to a reception, owing to a previous engagement. He did so by penning the following note:

"Mr. J. Henry Neurich declines with pleasure Mrs. Van Uppson's invitation for the 21st, and thanks her extremely for having given him the opportunity to do so."

Hostess—"Oh, Mr. Poorman, there's a young lady here to-night that I know will just suit you."

Mr. Poorman—"It is indeed flattering to know that you understand my tastes. What is the young lady like?"

Hostess—"Well, she hasn't got much sense, but she's worth a million."

KUMFORT HEADACHE POWDERS

THE picture illustrates your feelings when in the grasp of those raging and splitting headaches. What you need is not something that deadens your nerves and dulls and otherwise injures you, but a good, safe, reliable medicine like KUMFORT HEADACHE POWDER. These powders are made of the very ingredients Nature intended for the cure of headaches. They give relief in a few moments and wherever used are recognized as the one quick, safe, sure headache cure.

They have been a standard remedy for many years. They have no superior. We do not claim that these headache powders are cure-alls, or that they will do the impossible, but we do claim that there is nothing else known to medical science which acts so quickly and effectively in cases of headaches of all kinds.

Your druggist sells KUMFORT HEADACHE POWDER. Put 10 cents for four powders; 25 cents for twelve powders. If desired, you can secure them direct from us on receipt of price.

JOHN D. BUCKLEY, Merchant at Rogersville, N. B., writes: "The best remedy for a headache that I have ever used. They cure in a few minutes, create no habit, and I have found them safe and harmless."

A. V. SAVOY, of Neguac, N. B., writes: "They are the most satisfactory and perfect cure for headache I have ever known."

N. S. MILLER, of Newcastle, N. B., writes: "I can safely recommend Kumfort Headache Powders. They are a good thing for my headaches."
