SPAIN IS PROSPERING.

(Duluth Herald.)

Surprising news bas come from Spain. Prosperity, instead of ruin, has come to the Spaniards as a result of the war with this country. The news runs thus: "No longer drained of her young men to mair tain a colonial empire, and free from the annual expense of \$100,000,000 which it was costing to maintain the colonies, Spain is prospering. The government asks for a loan of \$200,000,000, and the Spanish people subscribed \$600,000,000. New factories are being built, even electric cable works; electric traction is being introduced in the Spanish cities, and at Madrid, such is the increased activity in business and travel, two fine new modern hotels areto bebuilt atonce. Every improvement known to modern hotels will be introduced. Today Spain, once more thriving, is buying beavily of machinery and sending large orders burden which has been removed from the shoulders of the Spanish people the McKinley administration would put upon this country. The expensive colonial system is part of the Republican party's imperialistic rogramme. It means that the whole country is to be taxed heavily to enable a few capitalists to make money by trading in colonial

THE GREAT MOSOUE

OF CAIRO (Prof. Stanley Lane-Poole, in Longman's.)

It is only with the arrival of Turkish governors in the middle of he ninth century that architecture can be said to have begun, in Muslim Egypt, with the Mosque of Ibn. Tulun. This remarkable man's father was a slave from Bokhara in the bodyguard of the Caliph of Bagdad. It was the way most governbegan. The Caliphs had discovered that Turkish slaves were etter servants, braver soldiers, and honester governors than the fickle, jealous, and intriguing Arab, and the statemanlike qualities of the Turkish slaves soon gave them the command of the empire. They took pains to prepare themselves for power. Ibn-Tulun was a highly well as a trained soldier. He not only studied in the great colleges at Bagdad, but journeyed to Tarsus to attend the lectures of eminent professors. He became a critic and a theologian. When he was made governor of Egypt, in 868, he had to borrow money for his expenses; but his ability soon brought him wealth and practically independent power. He kept 12,000 black troops from the Soudan; his house was pen to all, and he spent £500 a day on his table. He was the first of the Calipha! governors to revive the separate glory of Egypt and beautify her capital. In his new royal suburb of el-Katal or "the Wards," between Fustat and the future Cairo, he erected a palace, made eparate wards or quarters for the fferent races and classes of his ervants and troops, and built the famous mosque, which remains to this day a lasting monument to his taste and his munificence. It does

not matter where he got his ideas or

how large a share a Coptic architect

and Byzantine models had in the

design and decorations. The main

point is that under this brilliant

monument unsurpassed in its large and simple cornament and unprecedeted in its employment of the pointed or Gothic arch. The pointed arch also occurs in the Nilometer on the Island of Roda, close by, which is a few years earlier; but the mosque of Ibn-Tulun stands in the history of architecture as the first example of the general adoption of the pointed arch throughout

Baking Powder Leunohiy

The manufacturers of Royal Baking Powder have always declined to produce a cheap baking powder at the sacrifice of quality.

The Royal is made from the most highly refined and wholesome ingredients, and is the embodiment of all the excellence possible to be attained in the highest class baking powder.

Royal Baking Powder costs only a fair price, and is cheaper at its price than any similar article.

> Samples of mixtures made in imitation of baking powders, but containing alum, are frequently distributed from door to door, or given away in grocery stores. Such mixtures are dangerous to use in food, and in many cities their sale is prohibited by law. Alum is a corrosive poison, and all physicians condemn baking powders containing it.

It is stated that Austria is the only country under the sun where a woman is never put into a prison-Whatever her crime, she is sent to one of the convents which is devoted to such charitable work, and there detained during the time of her sentence. Strange to relate, the convent has no other guard than any other convent bas; a nun is portress there as elsewhere. We commend this object-lesson in reformatory work to the women of the United States .- S. H. Review

The London Tablet translates this sragraph from a newspaper pubished in Malaga:

A sensational and interesting incident which profoundly impressed the public occurred last night in he theatre of Atarazanas. The play "El Mississippi" was being represented when there passed close to the theatre the Holy Viaticum. At the solemn sound of the little bell the actors suspended their play and devoutly knelt down, whilst the orchestra played the Royal March. The spectators, greatly moved, also knelt down; and, presently getting up, broke forth into vociferous oheers, which lasted a long time.

The new Cathedral in Westminster is rapidly approaching comple-tion. It will be the largest building used for ecclesiastical purposes that has been erected in England since the "Reformation." ts extreme length will be 360 feet and width 156 feet.
