THERMOMETER AT OR NEAR ZERO TWENTY TIMES IN FIVE WEEKS

After the prolonged spell of seven or eight weeks, these probs will be sure to please most Londoners. During the greater part of January the mercury hovered around zero, the thermometer registering 22 below on the night of the the coldest of the winter. The 5th, the coldest of the winter. The month of February to date has also been extremely cold, with but few extremely cold, with the cold cold cold, with the cold cold, with the cold cold cold, with the cold cold cold cold ceptions the mercury falling below zero each day. THE FIRST SLEIGHING.

On Nov. 12 some snow fell, and the first sleighing of the season was taken advantage of by Londoners. It was but a light fall, however, and soon melted. Then on the night of Nov. 17 snow fell in great quantities, and since the 18th of November there has been continuous sleighing in London. This covers a period of between fourteen and fifteen weeks. Old-timers state that not in 60 years has as severe a winter as the present one been experienced. Doctors and undertakers report the winter to have been very hard on old people and invalids, and there has been much sickness from pneumonia and grippe in the city.

The intense cold and the great falls of snow have also greatly inconvenienced the public, and have put hund; reds of thousands of dollars out of the hands of the transportation companies and merchants. For instance, the THE FIRST SLEIGHING.

hands of the transportation companies and merchants. For instance, the earnings of the Grand Trunk Railway Jan. 31.. are reported to have fallen off over Feb. \$250,000 in one week, while the cost of operating the road was doubled. In fuel alone the winter has cost Londoners half as much again as in previous Feb. winters. Families who have managed Feb. to get along with six tons of coal from Feb. October till May, have burned up their Feb. six tons already, and are now buying Feb. 10. more. And the local coal and wood Feb. 11. dealers, owing to the railways being Feb. 12. blocked, have found it extremely dif-ficult to secure fuel with which to supply their customers. HARD ON FUEL.

Indications Are That Attendance at St. Andrew's Society Concert Will Be Very Large.

The annual Sabbath school entertainment of the Presbyterian Church has W. Cosens to remain the pastor for the coming year, and commendatory words were spoken of the work done in the past two years by Rev. and Mrs. Cosens. The reverend gentleman replied appropriately, expressing the pleasure it had given him to work with the board. He accepted the invitation, and thanked the board for the complimentary references to himself and his wife.

Mrs. Fred McCracken is recovering from a severe illness.

Today the weather man has changed his usual predictions, and instead of announcing a continuation of the bitter cold, the probabilities say more moderate weather is to be expected. After the prolonged spell of seven or eight weeks there weeks there were the seven or eight weeks there were the seven or eight weeks there were the says to see wagons from Detroit loaded with coal, coming over to Windsorites, there being, of course, no duty on anthracite entering Canada.
