#### SURE WAY TO GET RID OF BLACKHEADS

There is one simple, safe, and sure way that never fails to get rid of blackheads, that is to dissolve them. To do this, get two ounces of peroxine owder from any drug store—sprinkle little on a hot, wet cloth—rub over the blackheads briskly—wash the parts and you will be surprised how the blackheads have disappeared. Big blackheads, little blackheads, no matter where they are, simply dissolve and disappear. Blackheads are a mixture of dust and dirt and secretions that form in the dirt and secretions that form in the pores of the skin. The peroxine powder and the water dissolve the blackheads so they wash right out, leaving the pores free and clean and in their natural condition.—Advt.
