### NORMAL WINTER WHEAT IN UNITED STATES CROP

Associated Press Despatch.

Washington, April 9.—The average condition of winter wheat in the United States on April 1 was 83.0 per cent of normal, compared with 75.2 on that date last year, and 82.5 for the 10-year average. There was a decrease of 5 points in the condition between Dec. 1 last year and April 1 this year.

It is duly recorded at the city hall that in July, 1919, the city council increased fares for a stated period. Their bylaw was quashed in the lower courts, but subsequently upheld in the higher courts.

STREET RAILWAYMEN

Claim has Deen that the city council may again elevate the fares to five cents even should the majority of the members of the house support Sir Adam.

weakness. Around the opening, which was firm. some buying to cover business worked on Tuesday stimulated trade, but, as this volume was small, the market did not hold for any length of time, final prices showing a loss of 1/2c for May and July, with October 5/2c down.

Associated Press Despatch.
Chicago, April 10.—Influenced chiefly
by the government crop report, wheat
prices declined today during the early
dealings. According to one authority prices declined today during the early dealings. According to one authority the government report, if figured on the basis of the final par yleid per acre would suggest a production of 620,000,000 bushels an amount 71,000,000 bushels more than the estimate issued yesterday. Opening prices which ranged from ½c to ½c lower, were soon followed by slight additional sags. Enlarged receipts and scattered selling eased down the price of corn.
