THIS "WALKING DRESS"

For Fall Trotteurs is Especially Smart, You Know.

The smartest American designer is putting out this model set up in navy gaberdine with an interesting coat top

THE LATEST ONE

belted low. Cording and much stitching are both signs of autumn's note, so the long coat skirt has a corded hem. The collar and cuffs are organdie.

HOMEMADE CARAMELS.

No Reason Why One Should Not Be Successful With Them.

To make chocolate caramels take a quarter pound of grated chocolate, three ounces of butter, three-fourths pound of sugar, one gill of milk, two good dessert spoonfuls of syrup, a small dessert spoonful of glucose, half a tea-spoonful of vanilla essence. Put everything except the vanilla into a pan, and dissolve over a slow fire. Boil to 246 or 248 degrees, take off the fire and add the vanilla essence, and turn into a well greased tin. Mark with a knife when set and cut into squares and wrap each in wax paper.

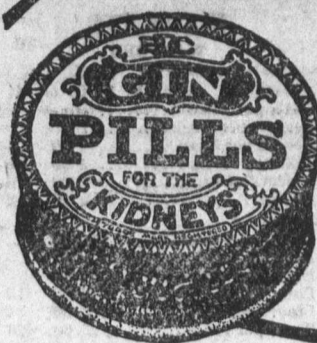

The tin should be greased with oil or clarified butter—i. e., butter that has been put into a pan and heated and the scum taken off as it rises.

Molasses candy (caramel) is made of three-fourths of a pound of sugar, a quarter of a pound of butter, one and a half pints of milk, two table-spoonfuls of molasses. Melt the butter and sugar in a saucepan, then add the sirup and milk, and boil, stirring till it leaves the sides of the pan clear. Pour on to a buttered plate and when nearly cold cut into squares and wrap each in wax paper. If a thermometer is used it should boil to 252 degrees. Ten to fifteen drops of vanilla can be added, if liked, before turning it on to the buttered plate.

Galatea For Frocks.

It is astonishing to note that galatea is being used in dresses for grown-ups. Hitherto it was confined to dresses for the schoolgirl and little tot, but at the present time it is also adapted for mother. It is shown in plain colors, such as blue, green, rose and white, and often trimmed with pique or a combining fabric. Other models are shown in striped effects, the foundation being white and the stripe in color. One particularly attractive dress was seen recently, the colors being blue and white. The arrangement of the stripes affords a novel detail. The odd flat collar with flat satin tie and deep cuffs are of white pique. The broad brimmed hat and high button boots are details of interest. A gown of this type is especially useful for morning and informal wear. Galatea is an excellent fabric for use in middy blouses and sports skirts, because it has sufficient body to avoid getting crumpled. It is also very suitable for simple sports shirts, where the skirt is a two piece model and the coat a box cut, which is belted at the waist line. With appropriate hat and shoes a suit of this type proves an ideal and practical summer outfit. As a "tub" frock, that is so indispensable during the equal months, there is nothing to equal the waist dress of galatea in plain or

GinPills FOR THE KIDNEYS

Rosebank, Man., April 15.
National Drug & Chemical Co., Montreal.
Dear Sir:—
I was troubled with my kidneys and I bought a box of Gin Pills. By the time I had used one box the pains in my back were gone and my kidneys were much better. I can recommend Gin Pills to all suffering from Kidney Trouble as I know they helped me.
Yours truly,
E. L. Fennell.

At all druggists, 50c. a box or 6 boxes for \$2.50. We guarantee absolute satisfaction or your money back. For free sample write to

striped effect.

Homemade Motor Veils.

Just a length of chiffon or similar weight veiling, twenty-seven inches or more in width and about one and one-half yards in length. Both ends are finished with a tiny hem. Insert a nine inch length of round elastic and attach at each end of the elastic a narrow ribbon string. The veil is adjusted by placing the elastic edge well down over the hat in front and holding the veil in place over the hat by tying the ribbon strings at the nape of the neck. Many of the bordered motor veils frequently sold so reasonably are long enough to make two of these handy requisites.

Lye and Insects.

[C. P. Gillette, Colorado station.]
There is an old notion, more or less prevalent among farmers and fruit growers, that lye applied to the trunks of trees during the dormant season will destroy the insect pests that may be living over winter upon the bark in the egg, larva or pupa stages.

Investigations at many experiment stations throughout the country have all indicated that lye is practically useless for the destruction of insects in any stage of development. It is better to make the application of some particular insecticide that is known to be efficient for the destruction of the particular insect pest that is known to be present. The application of lye seldom does enough good to pay for the time or expense in putting it on.

Rye For Pasture.

Have you provided plenty of pasture for your hogs during the fall months? asks the Kansas Farmer. If not, rye may be sown any time during September or October on stubble land or after corn has been cut for silage or fodder. Live stock farmers find that rye makes excellent temporary fall and winter pasture. One and a half bushels to the acre is enough for early sowing, but two bushels should be used later in the season. Cover crops furnish a large amount of pasture at little expense and leave the soil in a better condition. Rye protects the soil from washing during the winter, which often takes more fertility from the soil than a growing crop. Next spring the rye may be turned under as a green manuring crop.

Apple Gluts Unnecessary.

The chief cause of a glut of apples and consequently the practice of feeding apples to hogs is lack of spraying, according to a Nebraska horticultural expert. Sound apples, the result of spraying, can be placed in cold storage because they will keep. But the apple grower who has not sprayed his apples finds them wormy and unfit for storage. So he with thousands of others throws his perishable apples on the market at the mercy of dealers and the public.

He takes what he can get because he must sell. You seldom hear of a glut of apples late in the winter, and the winter and the spring are the times when the man who raises sound apples sells them and gets his money.

Engineer Found Dead

Petrolia, Oct. 18.—James Codling, 55 years of age, was found dead at noon today in his engine house at the plant known as the John McDonald refinery, where he was employed as an engineer. Dr. R. M. Calder, coroner, was called, but considered an inquest unnecessary. Heart failure is assigned as the cause of death. A widow and family survive him. The family came to Petrolia from Forest about 20 years ago. One of his sons, William F., is a private in the 14th Battalion.

Warts are unsightly blemishes, and corns are painful growths. Holloway's Corn Cure will remove them.

Sarnia Man Killed in Clam Ore Bucket

Sarnia, Oct. 19.—Caught in the crushing jaws of a two-clam shell bucket which was unloading an ore boat, the Midland King at the Point Edward docks of the Steel Company of Canada, David Barclay, an employee of the company was killed today shortly after starting to work. The big bucket was descending to be oiled on the dock and he in some manner ran right into the jaws, which were being closed as the bucket came down. The engineer in charge of the hoist was taken to his home after the accident suffering from shock. An inquest was started at the city police station to-night, but was adjourned until later on in the week, after the jury shall have viewed the remains. The man was 56 years of age and had only been employed at the dock a few days. A widow survives.

If you really believe in Safety First, get a box of Takase pills for your sleeplessness, neuralgia, or rheumatism for they are absolutely harmless, and are sure to relieve you. Fifty cents a box at your druggists, or by mail from the Georgian Mfg. Co., Collingwood, Ont. 1

The Berlin Arms Manufactory has reduced the working period of its 4,000 woman employees to eight hours daily.

While mortality among women is lighter than among men, insurance companies have found risks on the lives of women unprofitable and write policies on their lives for limited amounts only.

In Lombardy, Italy, women have raised a great number of rabbits on their lands in order to supply furs for the soldiers.

A new club has been started in New York for women over 60 years of age which already has a membership of over 130.

Mother Graves' Worm Exterminator will drive worms from the system without injury to the child, because its action, while fully effective, is mild.
