Suppose you get at the rights of this roofing question-Slate makes a handsome roof, and a very fair roof, w

it's laid right,—and if you will pay the price. It's the only roofing that even compares with "Oshawa" Shingles for shedding wet. But-A slate roof costs 4 times as much to buy; thrice as much to lay; and weighs 7 times as much-which demands

heavy, rigid timbering to sustain it. Yet any slate roof will need repairs four times to an "Oshawa"-shingled roof's once,—and then it won't be fire-proof, won't be wind-proof, won't be lightning proof. "Oshawa" Shingles are all that,they're proof against everything that can affect a roof.

So-called "patent" roofings are mostly paper—that's the base and bulk of them, no matter what fancy names they bear. They can't stand much, at best; and they need painting and patching so very, very often that they're not so cheap as they seem,—not nearly so cheap.

Wood shingles are out of the question, practically. True, they're used a lot, but you wouldn't use them if you'd read "Roofing Right," the Pedlar People's free book. That would show you the facts about cost.

Well, that leaves the other makes of metal shingles. (Ever noticed how most of them dodge the use of the word steel?). They all cost about the same as "Oshawa" Shingles to start with. They are all hard to lay right. Mine are easy. And this is the BIG fact:-

Not one of those other makes is GUARANTEED. Mine are, -guaranteed to be a GOOD roof, in every respect, for

twenty-five years, or-a NEW roof for nothing. If that was all that could be said to praise "Oshawa" Shingles, isn't that one fact of the guarantee, plain and unequivocal, enough to warrant your preference? Better get samples and the book,-now. Write nearest warehouse.

The PEDLAR PEOPLE of Oshawa
