MOSQUERA'S FOOD PRODUCTS

BEEF-MEAL and BEEF-CACAO Concentrated, Predigested, Assimilable, Palatable.

MOSQUERA'S BEEF-MEAL represents in actual nutritive value at least six times its weight of lean beef. It is perfectly palatable, and will be tolerated with ease by the most delicate stomachs. It admits of being administered in a variety of forms, thus avoiding monotony in the food.

It may be given in any thick soup, condimented to suit the taste of the patient, or also mixed with biscuit powder, oatmeal porridge, and milk and sugar. Again, it may be mixed with chocolate, which makes a delicious beverage, or given in the form of a sandwich; and, finally, as a plain beef-tea, simply dissolving it in hot water, adding salt.

MOSQUERA'S BEEF-CACAO consists of equal parts of beef-meal, sugar, and a superior article of Dutch cacao. It does not require cooking, but may be mixed with warm milk exactly like ordinary chocolate, and so completely is the taste of the beef disguised that it can not be detected. Requiring, therefore, no previous preparation, it is most conveniently administered.

We have decided to accept the sole agency of these products only after a very thorough investigation, and we will at all times be responsible for their quality.

To physicians interested, a pamphlet fully descriptive of the special advantages, uses, and methods of administration of these preparations will be mailed, and prices furnished on request.
