

OVALTINE

TONIC FOOD BEVERAGE

IN THE SICK ROOM.

The ease of preparation of "Ovaltine" is an obvious advantage. The granules on being dropped into hot milk dissolve in a few seconds. Troublesome and tedious cooking processes are unnecessary.

A cup of "Ovaltine" contains as much nourishment as three eggs, and is digested and absorbed with the minimum of strain to the digestive functions. Its flavour is always acceptable even to the most fastidious, and the product may be taken for prolonged periods without any distaste arising. "Ovaltine" is distinguished from ordinary invalid foods in being unusually rich in organic phosphorus compounds. This, combined with its high nourishing value, has a remarkable effect in hastening the recuperation of convalescents, and in building up emaciated patients.

"Ovaltine" is composed of a highly concentrated extract of the vitalising and building-up properties contained in Malt, Milk and Eggs, and presents the essential elements of diet in well-balanced proportions.

Supplied by all druggists. Specially low prices are quoted to hospitals and kindred institutions on direct application to the Toronto Office.

A. WANDER Ltd., LONDON, ENGLAND.
