THE TYPEWRITER IN WAR.

Military authorities appear to be exhausting every resource that will add to the rapidity of communication between the field of battle and the commanding officer. For a long time the telegraph was mainly relied on for the instant transmission of intelligence, and then the telephone was brought into active use.

It has been recently seriously proposed that aides de camp and other carriers of information in time of war should be taught shorthand, in order to write down important communications with all possible speed, and the latest move in this direction is the introduction of the typewriter on the scene of military operations. One of the novel features of a recent military tournament in England was the use of the typewriter on the battlefield for the purpose of recording messages from signalers.

It is stated that the typewriter operator was also an expert cyclist, and had his Remington mounted on the handles of his machine. Riding in and out among the horses and gun carriages, which he did without the slightest mishap, whenever he came to a standstill he instantly braced up the cycle by a handy contrivance and pounded away at the typewriter while in the saddle. The message, when completed, was sent to the commanding officer in the rear by means of a trained dog.

DAIRY PRODUCE.

The Montreal *Trade Bulletin* says: Butter receipts during the past week were 4,572 pkgs against 3,625 pkgs for the week previous. The market continues to drag along in its old dull groove, the only business reported being for local account. Shippers are not buying, as they would be only too ready to sell on this market if the opportunity offered.

A few lots of creamery held on English account keep going forward, but there is no new business for export. Factorymen, desirous of realizing on their September and October goods, find it difficult to place it at the prices they are holding it at. A lot of September and October creamery was offered at 20½c without finding a buyer. Most of the October goods are held at 21c; but if the market were forced, 20½c would be the outside that could be got, but 20c would probably be nearer the figure. We quote:

Creamery, September.....	20 c to 20½c per lb
Creamery, August.....	18c to 19 c per lb
Eastern Townships dairy.....	16½c to 18 c "
Western.....	11½c to 16 c "

Add 1c to 2c per lb. to above for single tubs of selected.

Cheese receipts during the past week were 47,138 boxes, against 44,287 for the week previous. The usual quietness which obtains at this season of the year is still noticeable, although during the past few days cable advices have shown more disposition on the part of Britishers to do business, and in some instances they have raised their limits. Although business on spot is slow, some 15,000 to 20,000 boxes have been sold over the cable. Several large sales have also been made in the Ingersoll section within the past few days at 10c, and around that vicinity. As we stated last week, the bulk of the cheese has passed out of factorymen's hands east of Toronto, although probably 8,000 to 10,000 boxes could yet be picked up. Holders of finest September and October western goods could dispose of them at 10½c, but they are not sellers at that figure, believing in better values later on. We quote prices as follows.

Finest Western colored.....	10½c to 10½c
" " white.....	10½c to 10½c
" Quebec.....	9½c to 9½c
Under grades.....	8c to 9½c
Cable.....	48s 6d

Work is advancing well on the New Denver sleigh road.

The *Stevens' Enterprise* and *Wellington News* are now of the past.

A Montreal paper says that Mr. Robt. Horne Payne and Mr. R. E. Sperling, of the London banking house of Sperling & Co., have invested \$5,000,000 in British Columbia projects.

SUBSCRIBERS TAKE NOTICE.

COMMERCIAL JOURNAL subscribers who have received bills for amount due on their subscription account will confer a favor by remitting promptly. It costs money to conduct a commercial newspaper, and our friends will show their appreciation of the work by paying up AT ONCE.

The names of subscribers in arrears (to whom accounts have recently been sent are marked with a blue pencil.
