

REFINED ALE

The favorite Ale
of Western
Canada

Pure and well matured

E. L. DREWRY, Winnipeg

Soft, rich color effects are produced on shingles by the use of Shingletint.

There are many brands of Shingle Stains in the market, but only one *Shingletint*, which means much to the consumer, who may call for it by name and know he is getting the best Shingle Stain made.

Shingletint is a scientific combination of linseed oil, coloring matter, creosote and the necessary drying agents; its use not only beautifies but prolongs the life of the shingles.

Finished woods and descriptive literature sent free upon application.
