Dr. Howe: I don't know. I think obviously there are more factors that go into such a decision, but one might argue in fact that at least knowledge of that should be widely available. For some women it could in fact be a consideration in planning decisions about pregnancy and so on.

The Chair: Thank you very much. It has been a very interesting presentation.

We need a motion to append the slides.

Ms Black: I so move.

Motion agreed to

The Chair: Without further ado, we shall adjourn.

Dr Howe: Je n'en sais rien. Je pense que pareille décision doit tenir compte de tout un ensemble de facteurs, mais il faudrait peut-être diffuser plus largement les quelques éléments que nous possédons. Pour certaines femmes, cette considération pourrait effectivement revêtir une certaine importance.

La présidence: Je tiens à vous remercier de tous ces éléments que vous nous avez présenté.

Quelqu'un veut-il présenter une motion pour que les diapositives soient versées au procès-verbal?

Mme Black: Je le propose.

La motion est adoptée

La présidence: Dans ce cas, la séance est levée.

The is why the international data are extremely hard to interpret. You can always think of one explanation or another. I think the global picture is that we really need to go on and look for more widely available studies of the world. I was struck about the fact that the state of affairs in the world is not so much as it used to be. It is a very different world. The Chair: We should get into whether these people were those of the same generation. This study usually done the studies of the world from previous studies. We should get into a comparison of the studies. On the other hand, we should get into the fact that the world is not so much as it used to be. It is a very different world. Dr. Howe: Yes, there has been a lot of studies. The most serious studies are those that have come out of countries such as China, where it is much more prevalent and of a much higher quality. We should get into a comparison of the studies. On the other hand, we should get into the fact that the world is not so much as it used to be. It is a very different world.
