

The first part of the report is devoted to a description of the general conditions of the country, and to a statement of the results of the various expeditions which have been made since the first discovery of the gold fields. The second part contains a detailed account of the various expeditions, and of the results of each. The third part is devoted to a description of the various mines, and to a statement of the results of the various experiments which have been made to improve the methods of working them. The fourth part contains a list of the various minerals which have been discovered in the country, and a statement of the results of the various experiments which have been made to improve the methods of working them.
