

T. EATON CO. LIMITED

EARLY CLOSING.—On Saturday, July 1st, this store will be closed all day. After that, during July and August, the store will close daily at 5 o'clock and Saturdays at 1 o'clock.

Now's Your Chance to Buy Wash Goods.

It's little short of sensational the way we are selling Wash Goods these days. Perfectly new goods, in perfect qualities and correct colorings, at less than mill prices. No wonder our window display attracts so much attention. No wonder shoppers buy so eagerly and then send their friends to do likewise. We cleared out a mill's surplus stock, and so make it possible to sell 30c Wash Stuffs for 15c, 20c qualities for 15c, 15c qualities for 7½c; also 15c and 20c goods for 5c a yard. On Tuesday we have this line of Fancy Drills to sell at Eight Cents a yard:

9000 yards 33-inch Fancy Twilled Drill, in stripes and polka dots, a magnificent range of colors, such as red with fawn dots and stripes, brown with blue, blue and white, fawn and red, black with white, and many other shades. This quality we never sell in the ordinary way for less than 15c a yard. Our Price Tuesday morning

Yes, we'll cheerfully fill Mail Orders so long as the goods last, but orders should be sent in at once. Nine thousand yards will not last many hours at such a small price.

5.00 Dress Skirts for 2.95

On sale Tuesday morning at eight o'clock:

76 Ladies' Elegant New Black Dress Skirts, made of a high-grade broche moiré lustré, lined with percale, interlined with French canvas and bound with superior velvet, cut with pleated back and trimmed with buttons and cord loops. These skirts were made to sell at 5.00 each. While they last on Tuesday our price will be

2.95

SIGNIFICANT TRADE RETURNS.

The Dingley tariff is working famously in the direction of keeping Canadian goods out of the United States, while the Canadian tariff is working equally famously in facilitating the entry of United States goods into Canada. Returns compiled at Washington show that for the 10 months ending May 31 last the total export trade of the United States to Canada amounted to \$73,032,810, against \$66,330,872 in the corresponding months of 1898, and \$62,831,784 in those of 1897. Thus importations into Canada show a steady gain during the years in question, while on the other hand the imports into the United States from Canada show a steady reduction, the total imports into the United States from British North America during the periods under review having been \$30,068,674 in 1897, \$28,000,200 in 1898 and \$25,550,338 in the ten months of 1899.

Imports from Washington are quite consistent with the returns just issued at Ottawa. For the eleven months ending May 31, our exports show a decrease of more than \$4,000,000 over those of the corresponding period of last year. We are buying more and more of the United States goods, and the United States, according to the American returns the United States sends \$3 worth of goods to Canada for every \$1 we send to the United States. There is only one way to equalize the trade between the two countries and that is by the adoption by Canada of a truly Dingley tariff. Such a tariff would transfer to Canada the bigger part of the enormous trade the United States now does with this country. That is the kind of a trade treaty Canada wants with the United States. And the great feature about it is that we do not need to go to Washington to put it into operation. We can do the whole thing at Ottawa.

PROTECT THE MINERS. The terrible colliery disaster in Cape Breton the other day reminds us that Canada is rapidly developing as a mining country. It is only a few weeks since another disaster occurred at the War Eagle mine in Roseland. It is the duty of the Dominion Government and of the local legislatures to see that the utmost precautions are taken for the safety of miners in the prosecution of their work.

Our own mines have many miles in operation in all the provinces of the Dominion and no industry in the country will expand more rapidly than that of mining. Modern inventions admit of a much greater degree of safety for the men employed in mines than was possible some years ago. The equipment of some of the mines with telephones, electric light, etc., might be taken as a standard of what should be insisted on throughout the whole country.

TWO CENTS A MILE OR NO CHARTER. The district between Toronto and Niagara Falls is already very well provided with railways. As far as the general public is concerned, it is to be gained by the chartering of another line between these points. Local electric lines may be of service, but we need no new through route from Toronto to the Niagara frontier. The only betterment that is possible in the railway service from this city to Niagara Falls is to be gained by the chartering of another line between these points.
