

a very encouraging state. We have only 2 Denominational Sabbath Schools; while 4 others, consisting chiefly of Bible Christian teachers and scholars, are conducted on the "Union" principle. Removals are frequent, owing to many of our friends being renting farmers; and hence, although several have united with us during the year, our increase is small. The station is too large for one preacher to work.

PORT HOPE was set off last year as a separate station, and already the wisdom of the step is evident. "Numerically," says the Report, "we about double last year's return. Spiritually, too, we have advanced; and the society is living in peace. Our church is undergoing enlargement, to meet the want of an increasing congregation. Financially, we have gone beyond what was at all expected; and, with our increased accommodation, continued exertion, and the blessing of God, we fondly hope, after another year, to be self-sustaining—a position we might have nearly reached already, but for the great outlay in Church improvements and in paying off the long-standing Church debt.

PRINCE ALBERT.—"Expected good has not been fully realized; while some matters, with which were associated anxious fears, have been brought to a successful issue. The new Brick church at Williamsburg, (a gigantic undertaking, everything considered) costing about \$2,300, has been completed, and at its dedication was presented a free gift to the Lord. A Sabbath School has been organised in the new Church, with cheering prospects. We have had quite a number of removals, which, with deaths, &c., will leave our number a few less than last year. Our Quarterly receipts are in advance, but in Missionary money we are somewhat behind the previous return, owing to strenuous effort all over the Mission to free the new church of debt.

P. E. ISLAND MISSIONS.—Our Mission work on P. E. Island is progressing. The four stations declared to be self-sustaining last year, enjoy their independence and are doing well. The West Devon Church is to be finished this summer, and some signs of improvement appear on the Western Mission. The new Mission in Summerside, opened in July last, is not without encouraging prospects; though the difficulties are many, the opposition of some, great, and the friends few. A most eligible building site has been purchased, in one of the best parts of this rapidly growing town, at a cost of \$500, and the friends are already preparing to build.

SCOTT.—The Mission is about the same as in years gone by, with a little brightening in the prospect for the Uxbridge work. We trust that judicious legislation, at the Confer-
