

The cost of the buildings has amounted to about \$250,000. The grounds comprise about six acres of land.

A Law school has been established under the direction and tuition of three readers, designated respectively, The Reader on Common Law, The Reader on Equity, and the Reader on Real Property.

Four Scholarships have been established, one for students under two years' standing of £40 per annum; one for students under one year's standing of £30 per annum; one for students under three years' standing of £50 per annum; and one for students under four years' standing of £60 per annum.

UPPER CANADA COLLEGE

Stands on a site of nine acres opposite the Government House, fronting on King Street, and consists of a row of neat brick buildings. This institution was founded A.D. 1829.

The centre building is the College proper, containing large and well ventilated class-rooms, a library, a laboratory, a public hall, the residences of the principal and of the various masters being on either side. The College boarding-house, which has lately had a very large addition added to it, is spacious and fitted with every appliance, and does not appear in the view, as it recedes from the line of the other buildings. The same may be said of the gymnasium, &c. The lawn is handsomely laid out, and its cricket-ground and play-yards are extensive.

Eight exhibitions, varying in value from \$40 to \$120 per annum, are open to competition of the whole Province. The examination for these are entirely conducted by gentlemen unconnected with the Institution. It is modelled after the celebrated English Grammar Schools, and aims to impart a sound classical and commercial education. The College is munificently endowed. A large portion of our leading men received their education, either wholly or in part, at this College; and the success of its pupils in our universities is a further proof that it is conducted in an efficient manner.

THE TORONTO MECHANICS' INSTITUTE

Stands on the corner of Church and Adelaide Streets, and is a large, commodious, and imposing structure, 104 by 80 feet, designed in the Italian style by Messrs. Cumberland and Storm, architects. The erection of this fine building was the result of a most praiseworthy liberality on the part of the public and of the members of the Institute. The cost of the building and
