**The Bye-Election in Derry**

Contest Keenest in History—David Hogg a Protestant and Popular—His Opponent, Pakenham Law, Also Well Liked

(Politician in Toronto Star.)

The adoption of David C. Hogg as Liberal home rule candidate for the city of Derry, with the support of the Nationalist party, is a move on the part of the latter which is calculated to give the Unionists concern, for Mr. Hogg is a Protestant. Not only that, but he was formerly a large and popular employer of labor—the shirt factory which he established in Derry being one of the largest business enterprises in the city. Mr. Hogg's brother, Adam, at one time was for Derry in the Liberal interest, but was defeated by Sir Charles Lewis. The Unionist candidate, Pakenham Law, was regarded, prior to Mr. Hogg's adoption, as being safe to win, for he was known to a fairly well known and liked in Derry, county—of which county, by the way, Mr. Hogg is lieutenant. And, in an ordinary way, when the fight has been between a Nationalist and a Unionist, the result of the contest has been practically settled beforehand at the revision count, when the register of voters is brought up-to-date. If the fight were of that kind now, the Unionists would, they assert, hold the seat. But it is just possible that the subordination of Mr. Hogg's Protestant friends' vote may turn the majority on which they are counting into a minority. Mr. Hogg is a Scotsman and a regular gain in stature.

**BAR DOUKHOBOV LEADER**

United States Declines to Admit Vergin on Ground he is an Anarchist

Victoria, B. C., Jan. 16—An incident which will possibly develop into international controversy in two continents is reported in a telegram received by William Blakmore, provincial commissioner in Doukhobor matters from A. M. Evalenko, a New York linguist who acted as interpreter during the commission proceedings. This telegram announces that Peter Vergin, the dominant factor and head of the Doukhobor colonists in Canada, with whom Mr. Evalenko started from brilliant for Victoria some days ago with the object of conferring with the local government here on various matters, was stopped at Marcus, on the international boundary, by United States officials and forbidden entry to the United States on the ground that he is an anarchist. Vergin emphatically declared that neither theoretically nor practically has he advocated anarchy, and that he has no relations with anarchy or sympathy therewith. His statement was, however, not accepted and he is returned to brilliant. The facts will be officially communicated to the provincial, federal and imperial authorities.

It is not, however, apparent how action in Vergin's behalf can be initiated inasmuch as he is common with all his people, has declined to become a British subject by naturalization.

Great Britain imported 1,287,703 rabbits in the first six months last year.

**Had Weak AND Dizzy Spells.**

Those feelings of weakness, those dizzy spells and "all gone" sinking sensations, which come over some people from time to time, are warnings that must not go unheeded.

They indicate an extremely weakened condition of the heart and a disordered state of the nerves.

One dizzy spell may pass off, but the next may be more serious.

Those who are wise will start taking Milburn's Heart and Nerve Pills, before their case becomes hopeless. They have no equal for reviving and strengthening the business is towards combination.

Breeding animals are being sold as high as \$25,000 a pair. Already quite a number of additional ranches are being planned for next year. Almost half the money on deposit in the Dominion Savings Bank in Charlottetown has been taken out and put into foxes. The fever is still raging and the fact that the industry is being taken up in Nova Scotia and New Brunswick and far distant Russia, where the ranches must for a time get their stock on Prince Edward Island, has tended to strengthen the faith which the people of this province have in the business.

As a result of the organization of companies the revenue of the provincial government will be materially increased as these companies are taxed according to capital. Since 1910 when the sale of animals for breeding purposes began, the value of the industry has more than doubled and the stock in the ranches is now estimated to be worth from two to three millions of dollars. A meeting of the breeders is to be held soon and an association will be formed. Among other things they will talk over the establishment of some system of registration, such as applies to live stock, in order that the foxes may be registered and the pedigrees shown. It is thought by one who has been keeping a close track on the business that there are about 300 pair of high grade animals and probably as many pair of cheaper animals on the island, with several hundred pair of patches and reds in captivity. Next year, it is expected that the industry will be about double the number of foxes at present in the ranches.

Mr. Gordon Murphy, Elliott's Mills, P.E.I., writes:—"Too much praise cannot be given your valuable remedy, Dr. Wood's Norway Pine Syrup. I suffered terribly from a severe cold during the early part of last winter and found it almost impossible to get anything to relieve me. Hoarseness seemed to be continually troubling me, and my throat was so sore I could hardly speak for quite a long time. At last I was advised to try your remedy, and in a short time I got relief, and have never been troubled with a sore throat or hoarseness since. I hope others will be fortunate enough to give your remedy a trial and be convinced that it is all I say it to be."

**P. E. ISLAND FOX MEN TALK OF ASSOCIATION**

About 300 Pair of High Grade Animals There—Industry Doubled Since 1910

(Special to Times)

Charlottetown, P. E. I., Jan. 16—The fox industry still continues to furnish the island with sensations. It was thought that, when a syndicate purchased the Dalton ranch and its black beauties, and young that were yet unborn, for more than \$600,000, that the climax was reached. A few weeks after the purchase came the announcement that ten pair of animals from this ranch had been sold to a Russian nobleman for \$100,000. The new year had scarcely begun when another sensation was launched in the announcement that Frank P. Tuplin, of New Annan, had disposed of part of his stock for \$300,000 to a syndicate in which J. H. Winfield, manager of the Maritime Telegraph & Telephone Company of Halifax, and W. H. Covert, were prominent promoters. A day or two later came the report that James Tuplin, of Black Bank, had sold his ranch property to another syndicate made up of capitalists in Montreal and Prince Edward Island, for \$300,000. This news came on the heels of the announcement of a company being formed at Moncton with a capital of \$100,000, a large part of which was attained in Nova Scotia. This would indicate the tendency of the business is towards combination.
