WOODSTOCK, N. B., THURSDAY, NOVEMBER 14, 1861. NUMBER 16.

WHAT WOULD BE LEFT?

Dr. Russell, writing to the Times from Washington under date of October 7th, says:—

For my part the determination of the North to subjugate the South, even if it fails to hold it, appears perfectly natural; for what terms could the former expect now, if proposals of peace were made?

The moral which he draws from all this will be recognised as correct by those who look calmly on the matter.

A NOVEL WEDDING TRIP.—Previous to the meeting of the American Board in this city, arrangements were made for accommodating delegates at private houses so far as might be necessary.

Our Cleveland friend had little idea that he should be called upon to entertain such angels when he sent in his ham.

On a in the third story of Owen Kelly's New Brick Building, north side of King St, over the British House.

THE ENGLISH LOVE OF HORSES.

The English are perhaps the best horsemen of all civilized people, either of this country or of Europe, and the best horse is the English horse, for in every country of Europe and America he is sought after and prized as superior to the native horse.

It is not, however, only in horse flesh, but in all things pertaining to rural affairs, that the English excel every other people; to them we owe the improved breeds of horned cattle, of sheep, and swine, and we may add, of sporting dogs; their agriculture, too, ranks above that of every other nation.

Several men has worked for me who, though they had nothing when they came, are now well off. A young Scotchman worked for me over thirty years ago, who had but three cents when he began, but who now has a good farm of 200 acres, and well stocked, and he is free from debt.

A HOME FOR THE BRITISH LABORER.—In his second letter to the Dundee Advertiser respecting emigration to New Brunswick, the Hon. James Brown thus forcibly writes:—

In placing New Brunswick thus before your readers, I am telling them of no El Dorado, but of a region in which industry is sure to have a fitting reward; of a land in which the honest laborer, at the end of his early toil, may look forward to be comfortably settled in his cabin by the wild wood, and surrounded by his children's children in domains recovered by him and then from the wilderness.
