ADMIRAL BRIDGE WHO WILL WATCH THE RUSSIAN-BALTIC FLEET

PRaises OUR EXHIBITION. Dr. Twitchell Writes About It in New York Paper. WAS WELL PLEASED. Speaks of Various Departments and the Growth and Improvement in These Parts Indicated.

Dr. G. M. Twitchell, of Augusta (Me.), in an article in the New York Tribune Farmer, has good words for the St. John exhibition of 1904, and of the wonderful progress of the maritime provinces in the last fifteen years. Of the exhibition Dr. Twitchell writes "in point of exhibits and quality of the same, it was the best on record."

"It was a grand exhibition in every particular, especially strong in grains, vegetables, fruit and dairy products. In the dairy section one found seventeen entries of colored cheese, three in an entry, this coloring being in accordance with the English fancy; six entries of white, three each, seven entries of butter, two boxes each, fifty pounds or more; seven entries of prime, ten pounds or more, a total of forty-nine samples of cheese and forty-seven of butter. The show of fruit was grand, coming from many portions of Nova Scotia. From the experimental farms at Nappan (N. S.) there came a great variety of vegetables, berries and fruit, with abundance of birds giving in a clear manner the results of the experiments to determine the best and most reliable varieties to cultivate in field, orchard or garden."

"To encourage the growing of wheat the government has for several years distributed seed at low cost and offered special prizes for crops produced and exhibited, competition being both general and by counties. This called out an exhibit of grain very pleasing to look upon and surprisingly large to the eastern man. The work is to be continued until New Brunswick produces its own flour, surely a commendable step for the government to take."

The show of Jerseys was larger than that of the other breeds, but of the Guernseys there were many fine specimens. In fact, these two dairy breeds were a credit to the province. The Shorthorn class was another strong one, made up of good animals, there being four entries of aged bulls. The farmers take kindly to the Shorthorns because of the ease with which they are bred, and the fact that they are so profitable as the dual purpose breed, not realizing always that profit comes from specialized work and special purpose machines. Only one exhibitor competed for the Hereford prize, but he was one of the best known breeders in all the country, W. W. Blackburn, Amherst (N. S.).

The exhibition, covering six days, will doubtless do up more than 75,000 paid admissions, a large attendance when population is considered. The general manager, W. W. Hubbard, is a fitting agriculturalist, devoted to the interests of Nova Scotia. The influence of such grand exhibitions and the sharp competition must be felt for good in every village and on every farm.

"No reference has been made to the races, these being held in another park, two miles away, and under altogether different management. This is the rule throughout the province, and, while the champions of the races would like to unite the lines are sharply drawn between the two organizations. Entertainment of the society at Fredericton, the seat of government, will hold the exhibition a society made up of earnest, active business men; and the forward march of the year will be maintained, for there is everywhere enthusiasm in promoting the agricultural development of the country at large."

SCIATICA CURED. ANOTHER TRIUMPH FOR DR. WILLIAMS' PINK PILLS.

Mr. Etsell, of Walkerton, Suffered for Months and Got No Relief Until He Began the Use of These Pills. Of the many employes of R. Trux & Co., Walkerton, Ont., one stands higher than the other, and that is Mr. Etsell. He is a mechanical engineer, and has been in the employ of this firm for upwards of ten years. But although Mr. Etsell never makes among the few men who are never absent from their post of duty, the time was when he was so often absent as to present, all because of physical inability to perform his work. For years Mr. Etsell was a great sufferer from sciatica, and at times the suffering became so intense that for days he was unable to leave the house. He tried electric treatment, but this also failed to give relief, and in despair he had about made up his mind that his case was hopeless and that he would be a suffering, helpless cripple to the end of his days. One day a neighbor advised him to try Dr. Williams' Pink Pills. At first he refused, believing they would prove like other medicines, but the neighbor was so insistent, having herself been greatly benefited by these pills, so that at last he consented. The remainder of the story may be told in his own words.

"When I began taking these pills," said Mr. Etsell to a reporter of the Telescope, "I had been off work for three months. The cords of my right leg were all drawn up, and I could only limp with the aid of my stick. The pain I suffered was terrible. I could not sleep at all during the night, and I was in misery both night and day. At first I thought the pills were doing me no good but after I had taken six boxes I fancied I was feeling better, and was encouraged to continue the treatment. After that I got better every day, and by the time I had taken about fifteen boxes every vestige of pain had disappeared. For over a year I have not had a day's illness, and I can now do any kind of work I wish to do. I have not had a twinge of pain, and although I am forty years of age I feel as well as when I was twenty. Pink Pills cured me, and I have no hesitation in announcing them the best medicine in the world for sciatica."

The cure of Mr. Etsell proves that Dr. Williams' Pink Pills are not an ordinary medicine, and that their power to cure in all troubles of the blood or nerves places them beyond all other medicines. You can get these pills from any medicine dealer or by direct mail at 50 cents a box or six boxes for \$2.50 by writing The Williams Medicine Co., Brockville, Ont. See that the full name, "Dr. Williams' Pink Pills for Pale People," is printed on the wrapper around every box.

JAPANESE ADMIRAL BETRAYED PLANS: DEATEN TO DEATH BY COMRADES

Took Bribe of £12,000 from Russian Officials, and Told of Transports Sailing Which Vladivostok Squadron Afterwards Sunk.

Tokio, Nov. 3.—It has transpired that the loss of the Hanchi Maru and the damage done to the Sulo Maru by the Vladivostok squadron was owing to information having been given to the enemy by a Japanese admiral on the staff here. Telegrams were despatched to Fusan and communicated to the Russian by wireless telegraphy, which enabled the fleet to locate the transports soon after they left Muji. The admiral was found guilty of treachery, and his death sentence was read out to him by his inmates friend and comrade. The staff assembled and entered the room, which had been cleared of all furniture. The prisoner was made to take off his uniform. He was then hounded to death by his comrades.
