To PICKLE BEET-ROOT.—This vegetable makes an excellent pickle, and from the Brightness of its color, has a very pretty effect in a glass pickle-dish or jar. Wash the beet perfectly; do not cut off any of the fibrous roots, as this would allow the juice to escape, and thus the coloring would be lost. Put it into sufficient water to boil it, and when the skin will come off it will be sufficiently cooked, and may be taken out and laid upon a cloth to cool. Having rubbed off the skin, cut the beet into thick slices, put it into a jar, and pour over it cold vinegar, prepared as follows: Boil a quart of vinegar with an ounce of whole black pepper, and an equal weight of dry ginger, and let it stand until quite cold. The jar should be kept closely corked.

To PICKLE MUSHROOMS.—Clean them with salt and water, then put them into a saucepan with a little salt; keep them over the fire until the heat draws the liquor from them, adding a blade of mace, and distilled vinegar sufficient to cover them.
