

THE ACADIAN.

WOLFVILLE, N. S., NOV. 16, 1917.

Editorial Brevities.

Owing to the shortage of coal, Norway is greatly extending its use of peat for fuel. An output of 100,000 tons is expected this year.

THE ACADIAN has received with the compliments of the author's father, a most interesting little volume of poetry, entitled "Canadian Twilight," by Bernard Freeman Trotter, second lieutenant with Lecleres, who was killed in action in France, May 7th, 1917, with an introduction by W. S. W. McLeay, M. A., professor of English at McMaster University, Toronto. This young soldier, a son of Dr. Trotter, of Toronto, was a resident of Wolfville for some years and had many friends here. The poems in this volume were selected from a much larger number which he wrote, and published since his death, and will be of much interest to many friends.

THE ACADIAN had the pleasure this week of inspecting the splendid assortment of preserves, jellies, pickles and fruit juices which Mrs. R. deW. Archibald has prepared during the past summer, and which are now being packed in readiness for shipment to the hospitals in France for the use of our brave boys. Mrs. Archibald has done a most wonderful work and the result of her laborious and painstaking efforts presents a most tempting appearance. Mrs. Archibald is an adept at this kind of work and has unstintingly contributed her time and means to this most laudable undertaking. She has over a thousand jars and bottles now ready which will carry cheer and comfort to many a wounded boy. Probably no other woman in Canada is doing so much for our soldier boys and this would be better appreciated if our people generally had the privilege which was ours of examining the excellent things that have been prepared. All honor to her, and may she have a most generous assistance in future efforts than she has enjoyed in the past.

Our Heroes.

The Wolfville boys at the front have suffered seriously of late. Within the past week the following casualties have been reported: Lieut. Frank Hutchisson, killed. Edmund Hutchisson, gunshot wound in leg. Harold Vaughn, gunshot. Brenton Eagles, wounded in hand. Henry Ruffe, wounded in chest and arms. Douglas Borden, killed. Stanley Murphy, gassed. From Black River: Douglas Schofield, wounded. THE ACADIAN extends sympathy to all the sorrowing ones. Winfield Farris, killed. James Farris, wounded.

Fifteen Years Use of Baby's Own Tablets.

Thousands of mothers keep a box of Baby's Own Tablets in the house as long as there are little ones about. Among them is Mrs. Marcel D. LeBlanc, Memramcook, N. B., who says:—"For the past fifteen years I have never been without Baby's Own Tablets. Whenever any of my children are ailing the Tablets promptly relieve them. I have such faith in them that I never hesitate in recommending them to any of my friends who have little ones in the home." The Tablets are sold by medicine dealers or by mail at 25 cents a box from Dr. Williams' Medicine Co., Brockville, Ont.

Rural Planning and Development.

A NEW REPORT ON PROBLEMS OF VITAL AND CURRENT INTEREST IN CANADA.

The latest report of the Commission of Conservation deals with the important subject of the planning and development of rural districts and small towns in Canada. It has been prepared by Mr. Thomas Adams, Town Planning Adviser of the Commission, who has made a close study of the problems of rural development in this country during the past three years, following twenty-five years experience in farming, land surveying and town planning in other countries. The report deals comprehensively with the social conditions and tendencies in rural areas and the prevailing systems of land settlement and development. It indicates the rural problems requiring solution in order to secure the proper development and economic use of land for purposes of efficiency, health, convenience, and amenity. The great injury which land development suffers, from speculation, neglect of public health, and want of expert business administration of land settlement, is considered. Incidentally, the problem of returned soldiers is dealt with, and the connection between land development and such questions as taxation, unemployment, and high cost of living is clearly shown.

Having regard to the need for more attention being given to production in Canada; to the extent to which production is impaired by speculation in land, by neglect of systems of health, and by haphazard systems of development; to the importance of increasing the supply of human skill and energy and of capital derived from production instead of by borrowing; the problems dealt with in this report are of vital and current interest to the people of this country. There are five appendices by competent authorities, and the concluding chapter gives an outline of proposals and makes general recommendations to cover the conditions as presented.

Vegetables Should Be Properly Stored.

This year, in response to appeals for increased food supplies, Canadians have produced a record crop of vegetables.

That the greatest use may be made of these products it is essential that care be exercised in their storage and preservation. A cool, dry cellar is the best place to store vegetables. Carrots, parsnips, beets, etc., if covered with sand, will not dry and shrivel up. Cabbage are best taken up and hung by the roots individually. Green tomatoes, when too late to ripen outside, should be wrapped individually in paper and kept in a dark place to ripen, and, while not taking on altogether the color of those exposed to the sun, they are otherwise as satisfactory. Tomatoes thus ripened may be used till Christmas.

Potato supplies for those who have not grown their own should be secured this autumn. The farmers have grown large quantities, and in many cases losses will be heavy if they find it necessary to store them. In addition, during several of our winter months, it is not safe to market potatoes, which leaves the consumer dependent upon the middlemen for supplies, usually at an enhanced price. By early distribution, the storage problem can be largely solved and much of the waste due to freezing avoided. If the same patriotic effort is given to the preservation of the 1917 crop as was exhibited in its production, very little waste will occur.

The Death of Miss Elizabeth Prat.

The death of Miss Elizabeth Prat, which took place early last Monday morning, came as a great shock to her numerous circle of friends in this town. She had been ailing for over a year and had undergone medical treatment since the early autumn of last year. Last summer she seemed for a while to gain and some latent hopes were entertained of her recovery. But the slight improvement was not maintained. It was not, however, until about ten days or a fortnight ago that a decided change for the worse was perceptible. Then she sank rapidly and after about forty-eight hours of unconsciousness passed away.

Miss Elizabeth Prat was the eldest daughter of Mr. Geo. A. Prat, our well known and highly esteemed citizen, and his wife, Mrs. Effie Prat. She was born in Paradise, N. S., but came as a child with her parents to Wolfville, where she has since resided. Miss Prat was a person of singularly fine character, and though unobtrusive and homelike, had a very large number of friends in this town. She was a life-long and valued member of St. John's church and ready and willing worker. For many years she taught in the Sunday school and was an active and prominent member of the Women's Auxiliary, and when her health permitted a regular and devout attendant at its services. Her departure will be a severe loss to the congregation. Widespread sympathy has been expressed for her parents and family in their bereavement. Besides her parents she is survived by three sisters and two brothers, Mrs. Collins, of this town; Mrs. A. Stewart Clarke and Mrs. Percy Starr; Mr. Geo. A. Prat, of Youngstown, Ala.; and Mr. Samuel Prat, of Boston, U. S.

The funeral was held on Wednesday afternoon at 3 p. m. There was a large attendance. The services were conducted by the pastor, Rev. R. F. D. A number of hymns were

School Boys and Birds.

The little 22 rifle in the hands of the boy is a serious menace to bird life. Give a young lad one of these miniature rifles, and he is at once ambitious to test it out on killing something. If school boys were taught their dependence upon the work the birds do to protect man's food supply from destructive insects, they would place a much greater value upon their feathered friends.
