

ASBESTOS PIPE COVERING

You can save fuel and add to the capacity of your Heating System by covering your Steam and Hot Water Pipes with Asbestos Pipe Covering. A square foot of uncovered pipe, filled with steam at 100 lbs. pressure, will radiate and dissipate in one year the heat put into 3,716 pounds of steam by the combustion of 398 lbs. of coal, thus 10 sq. ft. of bare pipe corresponds approximately to the waste of two tons of coal per annum.

WE CAN MAKE PROMPT SHIPMENT OF ASBESTOS PIPE COVERING FOR ALL SIZES OF PIPE FROM 1/4-INCH TO 12-INCH
