

A horse in the field is worth two in the barn. You can't prevent Spavin, Singbone, Splint, or Corn from putting your horse in the barn but you can prevent these troubles from keeping horses in the barn very long. You can get

KENDALL'S SPAVIN CURE

at any drugstore at \$1 a bottle, 6 for \$5, and Kendall's will cure. Thousands of farmers and horsemen will say so. Our book "Friesies on the horse" free.

Dr. B. J. KENDALL CO., Toronto, Ont., Ill.

HOW ARE YOU SPENDING

Your Winter Evenings?

Isn't there something you would like to "study up" now that you have the time? Then why not get our Catalogue of Rural Books? You will find it covers practically every farm subject. You can have this catalogue merely for the asking. Send a card for it to-day.

Reading Broadens Your Knowledge

Why not do some studying this winter on your own line of business?

Our best farmers are almost invariably heavy readers, at least 75 per cent of our information comes through printed matter—papers, books etc.

Get our Catalogue of Books. Select something in which you are interested and "Make this winter count."

If you can put into practice what you learn, it should mean many dollars to you next summer.

FARM AND DAIRY PETERBORO, ONT.

THE GATE THAT SERVES YOU BEST

THE PEERLESS

Braced Like a Steel Bridge

JUST as the engineer strengthens the points of strain in a big, mighty bridge, so we have designed braces, stronger than was necessary, to make our gates stiff and rigid. They can't sag—they can't twist—they are a great improvement over gates made the old way.

Peerless Gates

are made of first-class material. Frame work of 1½ inch steel tubing electrically welded together. Peerless pipe braced gates are all filled with heavy No. 9 Open Hearth galvanized steel wire—weather proof and stock proof.

Send for free catalog. Ask about our farm and poultry fencing, also our ornamental fences and gates. Agents nearly everywhere. Agents wanted in open territory.

BANKWELL-HOXIE EIRE FENCE CO. LM.

Windsor, Ont. Hamilton, Ont.

ticularly well suited to go with the foregoing roughage mixture, is desired, then both the oil cake meal and cotton seed meal, in quantities mentioned heretofore, might be used.

A New Year Letter to Farm and Dairy

"Farm and Dairy seems to me to grow better every issue, and I think that you have placed yourself in the very front of Canadian papers as a farm paper, and I might safely say that you rank in the very front as a dairy paper, regardless of national boundaries.

"One phase of your issue which I think is particularly commendable is the history and description, and treatment of the conspicuous, constructive breeding herds of dairy cattle throughout the country. Nothing gives the average farmer more specifically and definitely an interest in any one breed than to read of the foundation, growth and development of other men's herds. So many farmers think that it takes a great deal of money to establish a herd, and that it is too large a proposition for them to undertake, and I think from the discussion and presentation of the history of the herds presented by you they learn that these foremost breeders in almost all cases were once just ordinary farmers, with an ambition and a courage to attempt to attain in part that which they desired. I like that feature of your paper very much, and I approve of the entire paper.

"Wishing you a continued growth and success, and a full measure of the joys and blessings of the season,"
—J. A. McLean, Professor Animal Husbandry, Mass. Agr. College.

Records are Practical

C. F. Whitley, In Charge of Records, Ottawa

Almost every dairy farmer who commences to weigh and sample his cows' milk individually says at the end of a few months, "I find some in my herd were kept at a loss." Some men find only one or two cows, others state that they have found too many in the herd play a losing game.

What does this mean? Just this: That despite all the experience gained from years of practical dairying, the farmer finds that in order to become thoroughly "practical" he must have the aid of dairy records. Neither the cow's appearance, nor the owner's knowledge of some short-period yield of milk (extraordinary as that yield may have been for a day, or one week, or a month) will testify with certainty to each individual cow's ability to pay her way for the whole year. Cow testing provides a simple and eminently practical way of discovering, not only if each cow pays, but which cows pay the most profit on the twelve months' transaction of feed consumed, milk and fat produced. Those large profits are revealed only by practical cow testing.

Cows are apt to cheat the unsuspecting dairyman unless he keeps tab on the performance of each one; many dairymen have found this out to their utter astonishment and regret. Don't take chances with your herd, be certain that each cow pays; it pays you to find out. Individual cow records help a practical farmer to build up a profitable herd.

When boys were told that the pig's tail accurately registered the animal's condition as the thermometer did the temperature of the atmosphere. If coiled tightly the pig is healthy and happy, but if slack look out for trouble.

Caldwell's Dairy Meal

is not only another Caldwell product, but a feed, scientifically mixed by the best-known feed expert in the Dominion, for the purpose of supplying an **existing and insistent demand.**

It is manufactured from re-cleaned and carefully selected materials and is guaranteed to contain no mill sweepings, oat hulls or other low-grade ingredients. More than that, its palatability is assured because it contains the correct proportion of our Pure Cane Molasses Meal, together with a large variety of high-class feed stuffs.

Remember this: The ingredients of Caldwell's Dairy Meal are printed on the tag attached to every bag, and guaranteed to the Government.

Here's the guaranteed analysis:—

Protein - 20%
Fibre - 10%
Fat - 6.3%

Caldwell's Molasses Meal

makes other feeds more palatable and digestible.

N.B.—You will oblige by promptly notifying us if your dealer hasn't Caldwell's Dairy Meal on hand. Write for booklet.

Molasses Meal, Dairy Meal, Cream Substitute, Calf Meal, Poultry Meal.

Little Pigs Got the Barley

The Ontario farmer is "getting wise." A grain-buyer the other day asked a farmer on the market why he did not market his barley. The farmer was ready with his reasons.

He drew a little notebook from his pocket, in which were neatly kept figures. He proceeded to explain them. Last year this farmer bought a sow for \$41. The sow bore nine little pigs. He reared them, and kept track of their cost. The principal items of their feed were 100 bushels of barley and 40 bushels of oats. Reckoning the barley at 40 cents a bushel, and the oats at 40 cents, the grain fed the pigs would cost \$72. Slope and other feed were not taken account.

In due time the pigs were sold, and the farmer received for them \$125. On an investment, accordingly, of \$111, he made a profit in one year of \$14, and still had the sow. Reckoning the sow as worth \$45, the price received for the pigs would equal nearly \$1 per bushel for his barley. Of course the farmer's time and work tending the little pigs should be taken into account, but even then, it is worth while with barley at its present price of around 40 cents—Toronto Globe.

Use this coupon, and make money from now on, breeding pure-bred pigs. Mail it immediately so that you will get your supplies by return mail and can start to work right away.

Farm and Dairy, Peterboro

I will try and secure nine new subscribers to Farm and Dairy to earn a pure bred pig. Please send me sample copies, subscription blank, etc.
