

CONSTIPATION IRREGULARITY OF THE BOWELS

Any irregularity of the bowels is always dangerous, and should be at once attended to and corrected.

MILBURN'S LAXA-LIVER PILLS

work on the bowels gently and naturally without weakening the body, but, on the contrary, toning it, and they will if persevered in relieve and cure the worst cases of constipation.

Mrs. James King, Cornwall, Ont., writes: "I was troubled with sick headaches, constipation and catarrh of the stomach. I could get nothing to do me any good until I got a vial of Milburn's Laxa-Liver Pills. They did me more good than anything else I ever tried. I have no headaches or constipation, and the catarrh of the stomach is entirely gone. I feel like a new woman, thanks to Milburn's Laxa-Liver Pills. I used in all about half a dozen vials."

Price 25 cents a vial, 5 for \$1.00, at all dealers or mailed direct by The T. Milburn Co., Limited, Toronto, Ont.

The "BACON" Seed Drills and Cultivators

The only Rear-Wheel Driven Seed Drill on the market. The feed in the "Bacon" handles seed without bruising or breaking, and seeds evenly to the last seed. Machine instantly converted from a regular seed sower into a hill dropper. Feed cut prevents waste of seed when turning rows. For sowing Sugar Beets, Parsnips, Radishes, Carrots, Onions, etc., the 1908 model of the "Bacon" is unequalled for strength, lightness, easy running and good work. Write for our complete catalogue.

IF YOU'VE NEVER WORN TOWERS SLICKER

CONTENTED LOSER.

"Pat, I hear you lost five dollars in an election bet with McCarty."

"I did, sor, an' o'im glad av it, be-gorra!"

"Glad of it? Why are you glad of it, Pat?"

"Beccoz, er won twenty dollars from Flannigan in a bet thawt o'd lose the five dollars oi bet wid McCarty."

QUESTIONS AND ANSWERS. Miscellaneous.

SCARLET FEVER.

A Beeton, Ont., correspondent writes, suggesting that, in view of Sec. 93 of the Public Health Act (R. S. O., 1907, Chap. 248), certain answers given in this journal recently to questions submitted by him regarding payment for services of a medical health officer, and his powers, may be incorrect. We would just say that in answering the questions the Act and Section thereof referred to were duly considered, and that the answers given are quite in keeping with the provisions of the Act on the one hand, and the facts of the case as set forth in the statement sent us, and published, on the other.

SOOT IN CHIMNEYS.

Can you tell me of a chemical used to put in stoves that will eat the soot out of chimneys? P. S. H.

Ans.—I know of no chemical that is used in the stove for the purpose of removing the soot from the chimney. I know it is a practice in some cases to use some very inflammable material which will cause the flame or partially burnt parts of carbon to get into the chimney and set fire to the soot there and thus burn it up. For instance, sometimes straw, large amounts of paper, or even fat, are placed in the stove, which, on burning, make sufficient heat to ignite the soot in the chimney. If the chimney is properly made, there should be no danger in burning the soot out, provided no particles are allowed to fall on the shingles of the roof. With a slate or iron roof, or at a time when the shingles are wet or covered with snow, there should be no danger in following this plan of cleaning the chimney. R. HARCOURT.

O. A. C., Guelph.

ROTATION—NUMBER OF COWS.

1. Can you suggest any improvement on the following five-year rotation: 1, clover; 2, grain (oats); 3, grain, barley and oats, mixed; 4, roots, corn and peas; 5, barley, seeded to clover. Any better arrangement of the above-mentioned five crops as a five-year rotation, with 3/5 of land in grain, 1/5 in clover and 1/5 in roots, will be very acceptable.

2. How many milk cows could be profitably fed with following available feeds: 17 acres, average permanent pasture; 10 acres, average alfalfa hay; 15 acres, corn and roots, and straw of 45 acres of grain, with additional meal necessary?

Dufferin Co., Ont.

J. F. M.

Ans.—1. We are of opinion that, notwithstanding the fact that our inquirer has 17 acres permanent pasture and 10 acres of alfalfa, he is proposing to devote too large a proportion of his rotation acreage to grain. To obtain maximum yields of corn and roots they should follow sod; assuming, in the case of the roots, that the sod is a friable clover sod of one year's standing. Corn, especially, should follow sod. In fact, so important is this that we would be inclined to adhere to it even though it left the three grain crops to follow each other in succession. Obviously, however, it is not well to have three grain crops together, hence we would make a special effort so to arrange matters that the grain acreage might be diminished by at least a third. If, though, our inquirer is definitely decided to devote three-fifths of his acreage to grain, we would suggest first year clover, second year peas or peas and oats, and fifth year barley, seeded down. If making any change in the above it would be to put peas after clover and hoe crop after peas. This might be advisable if the hoe crop consisted chiefly of roots.

2. A good deal will depend on the system of management. With a silo to utilize the corn crop, and with green crops, such as corn (or silage), alfalfa and mixed grain to help out the pasture, it should be easily possible to keep 25 cows under the conditions specified. With a three-year rotation of corn and roots, followed by grain, seeded to clover and left one year in meadow, it should be possible to better this considerably in course of time. One cow for every two acres is a moderate ideal, not beyond the ultimate reach of a first-class dairy farmer in the average section of Canada.

Maplehurst Herd of Tamworth Swine. Bronze Turkeys, Toulouse Geese, Pekin Ducks, S. C. W. Leghorns.

Tamworths of excellent breeding and ideal bacon type. Herd won sweepstakes at Toronto and London, 1905-6-7-8; winnings at World's Fair, St. Louis, 1904.—sweepstakes aged and junior herd, and two grand championships. Apply to:

D. DOUGLAS & SONS, MITCHELL, ONTARIO.

CHESTER WHITE SWINE

A choice lot of young stock. Write for prices. W. E. WRIGHT, SUNNYSIDE FARM, GLANWORTH, ONTARIO.

THE SECRET OF STRENGTH

If you feel tired and stupid, with no ambition to get out and hustle; if you have spells of despondency and a desire to give up the fight, you need new energy. The race is to the strong. Show me a failure and I'll show you a weakling, lacking in courage, strength and ambition, three essentials to the make-up of a successful man.

I can take a man like that and pump new energy into his body while he sleeps, and in a few weeks' time transform him into a giant in strength and courage. It is proven that energy and electricity are one and the same thing. If you lack this energy you can get it only by filling your nerves with electricity. Dr. McLaughlin's Electric Belt does this. Wear it while you sleep. Feel its invigorating stream of electric life in your nerves, its vitalizing spark in your blood. You wake up in the morning full of new life, new energy, and courage enough to tackle anything.

The secret of strength, then, is plenty of electricity in the human body. Keep it full and every organ will do its duty; pain and weakness will disappear.

My Electric Belt does this while you sleep. It pours a steady stream of soothing electricity into the nerves and organs all night long, and is taken up by them just as a sponge absorbs water. It restores strength to every part that is weak.

Do you doubt it? If so, any man or woman who will give me reasonable security can have my Belt, with all the necessary attachments suitable for your case, and

YOU NEED NOT PAY UNTIL CURED.

Dr. McLaughlin:

Keewatin, Ont.

Dear Sir,—I have derived good results from the use of your Belt. My digestion is perfect; headaches and lassitude all disappeared after two months' use of your Belt. I am feeling stronger to-day than I have for the past eight years. I thank you for the Belt and advice, and will gladly answer all inquiries regarding my case. Yours truly,

MRS. L. JONES.

You will never know what a grand power electricity is until you feel its genial, glowing warmth penetrating every vital part of your body from my Electric Belt.

FREE BOOK.—Cut out this coupon now and mail it. I'll send this book without delay, absolutely free. Call if you can. Consultation free.

DR. M. S. McLAUGHLIN, 112 Yonge St., Toronto, Can.

Dear Sir,—Please forward me one of your Books, as advertised.
