**BROWN'S PATENT HAY LOADER.**

Since the first introduction of the Hay Loader, each succeeding year has added every evidence of its practicability, and it is now considered one of the greatest labor-saving machines of the age. It requires no extra men or horses, being attached to the rear of the wagon and operated by the same team that draws the load, adding to the draft the power of one man. It will load a ton of hay in five minutes, taking it up as clean as can be done with a fork. Although originally intended to run on hay raked in wind-rows, it may be used in heavy unranked hay, and will work equally as well in all kinds of loose grain, especially barley. For price, testimonials, and all particulars, address
