Jump from Bed in Morning and Drink Hot Water

Tells why everyone should drink hot water each morning before breakfast.

Why is man and woman, half the time, feeling nervous, despondent, worried; some days headachy, dull and unstrung; some days really incapacitated by illness.

If we all would practice inside-bathing, what a gratifying change would take place. Instead of thousands of half-sick, anaemic-looking souls with pasty, muddy complexions we should see crowds of happy, healthy, rosey-cheeked people everywhere. The reason is that the human system does not rid itself each day of all the waste which it accumulates under our present mode of living.

For every ounce of food and drink taken into the system nearly an ounce of waste material must be carried out, else it ferments and forms putrefactive poisons which are absorbed into the blood. Just as necessary as it is to clean the ashes from the furnace each day, before the fire will burn bright and hot, so we must each morning clear the inside organs of the previous day's accumulation of indigestible waste and body toxins.

Millions of people who had their turn at constipation, bilious attacks, acid stomach, nervous distress and sleepless nights have become real cranks about the morning inside-bath. A quarter pound of limestone phosphate will not cost much at the drug store, but is sufficient to demonstrate to anyone its cleansing, sweetening and purifying the entire alimentary canal before putting more food into the stomach.

entanglement of the many complications arising from the attempted use of Professor Relyea's newly discovered and much heralded marvel working Elixir of Youth? The professor attempts the impossible—to obliterate old age. However, he is led to believe that he has succeeded and it is in endeavoring to prove the worth of his discovery that those about him are involved in a series of apparently past-getting-away-from complications. There is said to be a good laugh at every turn, as the characters spin around in a vortex of situations, up to the very fall of the final curtain, when everything is righted right.

Assisting Miss Merritt are such well-known players as Carolyn Friend, Grace Johnson, Celeste Lestie, Dorothy Gray, Don MacMillan, Sterling Childs, Delancy Barkley, Sam Black and William Moore, among others.

BUILDING GOOD-WILL!

We have been telling you how we prepared for our present woolen needs by buying many months ago, before prices reached their present top-notch figures. We told you that we had hundreds of thousands of dollars worth of pure English, Irish and Scotch Woolens in our big Warehouse and Tailoring Plant at 260 Richmond Street, West, Toronto—but did we tell you that we could sell every yard of material we have to other tailors at thousands of dollars more than we paid for it instead of doing as we are doing, viz., giving our customers the benefit of our foresight and buying power by letting them have

Clothes to Measure at \$15 That They Cannot Get Elsewhere in Canada Under \$25 or \$30

We might easily have done as other tailors did—raise our price up to \$18, \$20 or \$25 and get this extra profit in war time. Others are doing it—why not we? Our answer is simply this, we are BUUILDNIG GOOD-WILL. We have thousands of customers—they live in all parts of Canada and order their clothes through our branch stores all over the Dominion. We are going to give them good clothes at \$15 as long as we can possibly do so—as long as our woollen stock lasts. Our price will not be raised until it becomes a question of raising the price or lowering the quality—the latter we will never do. Making Good Clothes at One Price—and that price the lowest possible—that's our persistent effort. By showing this spirit of service in dealing with our customers we have built up one of the largest exclusive one-price tailoring organizations in Canada.
