# \$100 Reward, \$100.

The readers of this paper will be bleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they effer One Hundred Deliars for any case that it fails to cure. Send for list of testimonials.

## PRISON PLOTS.

imes When Warders and Convicts Have Joined Forces.

A warder at Maidston2 (Eng.) jail was recently arrested and charged with aiding a convict under als sharge to forge a document which was to be used for swindling purposes. The case has a curious parallel in the which hapened at Rendsburg Prison, near Berlin, a little more than a year ago. For some time past counyear ago. For some time past counterfeit five mark pieces had flooded the country. The police failed utterly

aged to get impressions in bread-paste of the keys of the prison gates; No. 4 gave the "lifer" a couple of files, and the latter cut the skeleton

3 then managed to test them

No. 3 then managed to test them, and, finding they would work, hid them in a shed. But here a warder tound them, and, though it was impossible to prove who had made them, the "lifer" was promptly despatched back to Dartmoor.

In September, 1908, a number of Hindu anarchists were brought up for trial at Alipur, on the evidence of n informer named Goswami. They were hardly in the dock before two of them drew revolvers and opened of them drew revolvers and opened are upon the informer, who fell dead, while two Europeans were badly wounded. Here was another case of sing the hand of the pretty cook.

"The cook, blushing like a rose, flet at once to her kitchen. Mrs. Webstel get revolvers smuggled into the

## SALT IN MANITOBA.

lames Monkman Manufactured It Fifty Years Age. would be news to most readers

be told that salt was produced from he Winnipegosis brine fifty years go, writes J. B. Tyrrell in Canada Nest. James Monkman made salt at Swan River, Duck River and at Salt everything." Springs four hundred yards from the ake. Many years ago the Hudson say Co. profitably manufactured salt t Swan River, when on the Red River the price of salt was twelve shillings a bushel—or one hundred

weight of flour.

Monkman's works were of the most primitive description. When he found a spring he dug a hole five feet across and five feet deep, with a couple of cough stone walls alongside, and a chimney at one end. On this construction he set his shallow kettles, and ladled in the brine to be evaporated by the wood fire below. When winter came the kettles were turned apside down where they were and eft there until business was resumed in the spring.

Star.

As a vermifuge there is nothing so potent as Mother Graves Worm Exterminator, and it can be given to the most delicate child without fear of injury to the constitution.

"Eat 'em up! Eat 'em alive!" yelled the football coach. "Raw! Raw! Raw! Raw! Shouted the student body. "Gracious!" exclaimed the nervous of the primary of the prima

eft there until business was resumed in the spring.

Professor Hind found that Monkman knew nothing of the use of the bump or of solar evaporation. The kinnipegosis brines are not so strong is those which come from the rocal salt of Cheshire, and at present the heapening of transportation to the prairies may have rendered them, for the time being, unprofitable. But I should not be surprised any day to learn that some enterprising manufacturer has appealed to the Government for the protection of a native product, with a view to satisfying Manitoba's needs from Manitoba's supplies.

In the salt country, too, there are rocks almost ideally suited for the manufacture of cement, and I found a large deposit of gypsum, from which, presently, no doubt, the cornices of elegant homes will be manufactured.

Raw!" shouted the student body. "Gracious!" exclaimed the nervous old lady, witnessing her first game, "are they cannibals?" — Philadelphia Record.

Should Be Linked Up. That Newfoundland should be in-corporated with the Dominion as one of the provinces of Canada was the theme of a splendid address given by Hon. A. B. Morine, former Finance Minister and Minister of Fisheries of that colony, before the Canadian Club

of Winnipeg recently.

One of the chief reasons for this amalgamation was that of defence.
An enemy controlling Newfoundland would also control all the shipping trade of the Dominion. The Government sitting at Ottawa in time of war would realize fully the desirability of control. There was also the great would realize fully the desirability of control. There was also the great question of trade relations with the United States. Proposals for reciprocal trade had been made on several occasions and these proposals had failed chiefly for the reason that there were two men dealing with the United States, the representative of Canada and the representative of Newfoundland, when there ought to have been but one. There was also the question of immigration to be considered. Canada was spending millions in or-der to add to her population. In the ancient colony, there were 250,000 of the best people that the world con-tained. Why should Canada not make some effort to secure these people for the Dominion?

The speaker gave information with reference to the country in which he has spent 24 years. It had been discovered 123 years before the Pilgrims landed at Plymouth. Progress in the landed at Plymouth. Progress in the country had been slow in earlier years owing to the fact that it had been regarded as a colony which was to be used wholly for the benefit of the Mother Country.

Proposals for union with Canada had been defeated in the past for var-

ious reasons, but if the matter was now advocated, it was probable that in a few years, the men advocating

Politician (sarcastically)—I suppose you know how the country ought to be run?

Citizen (humbly)—No; I'd be satisfied if I knew only how it's being run

Citizen (humbly)—No; I'd be satisfied if I knew only how it's being run

run?

Citizen (humbly)—No; I'd be satisfied if I knew only how it's being run now.—Brooklyn Life.

"A banker from Spokane down in my district has beaten you," said a third. "He bought two sections two years ago for \$8.50 an acre. He got land cheap, I suppose, because he was a banker. He knew nothing about farming, so he had everything done by contract—breaking, plowing, fencing. seeding, and reaping. From his first season's crop he paid for the cost of his land and every expense, and had a clear profit left of \$2 an acre! That is what I call a record."

An Englishman who was presen ventured to ask some questions and the farmers promptly proceeded to instruct him. "Southern Alberta is God's own country," said one of them. "You need make no mistake about that. We have the climate, we have the land, and we are getting in the the land, and we are getting in the money. Eight years ago this was a ranching country, with numerous farms scores of square miles in extent, given up to big herds. The ranchers tried to keep the farmers back. When a man bought a half section for wheat-growing his neighbors would visit him and tell him all the hard-luck stories they could ir order to frighten and send him off If he could not be frightened trouble began. Great herds of cattle would stampede over his land and trample the crops down. Bad fires would start mysteriously around his home, and so on.

start mysteriously around his home, and so on.

"But the rancher had to-go. To-day the old-time ranches have practically disappeared, and all the good land in Southern Alberta is taken up with mixed farming. Most of it is held by Americans. I suppose that nine out of every ten of the people between the Canadian Pacific Railway and the United States border have come up from the south. They make first-rate farmers, they have money to start, they know the ways of work, and their sons are going to make good Canadian citizens. Sure!

"Two years ago you could have bought wheat land in Southern Alberta for from \$8 to \$12 an acre. Today you would pay \$30 to \$40 an acre for good land, and it is worth it. This has been an exceptional season, and large numbers of men owning a half section (320 acres) have been able to put \$6,000 in the bank from the harvest. Some of the best land gives as much as sixty bushels an acre, but that is quite out of the common. The average man who looks after things ought to obtain from twenty-five to thirty bushels an acre, or if he is on irrigated land thirty-five bushels. The land costs \$5 to \$7 an acre to farm. The wheat realizes here about twenty cents a bushel less than Chicago prices, the twenty cents going for elevator charges, dealers, commissions, and freight. We might put eighty-five cents a bushel as about the ordinary amount received by the farmer here. Now, you can reckon yourself that twenty-five bushels at even eighty cents a bushel as about the ordinary amount received by the farmer here. Now, you can reckon yourself that twenty-five bushels at even eighty cents a bushel and more an acre from his wheat land. A section (640 acres) is a fair size for a farm. Do you wonder that some of us are now beginning to go to California for the winter or that others are already talking of retiring?"

A Steel Canal.

In connection with the Nile irrigation system, at Wadi Kom-Ombo, a steel canal, 5,200 feet long, has been constructed to distribute water from the service reservoir to the earth canals. In section, this metallic canal is semicircular, 20 feet broad and 12 feet deep. It is made up of seventeen sections, connected by expansion joints, and the riveted steel plates of which it consists are six milimetres in thickness. During the construction the engineers were troubled, among other things, by the unequal expansion of the metal. The expansion was greatest on the side where the sun happened to shine full upon the plates, and the inequality was often sufficient to displace the end of a section about to be joined as much as four inches to one side or the other. A Steel Canal.

Glazed Eyes.

Snakes may almost be said to have glass eyes, inasmuch as their eyes never close. They are without lids, and each is covered with a transparent ent scale much resembling glass. When the reptile casts its outer skin the eye scales come off with the rest of the transparent envelope out of which the snake alips.

This glassy eye scale is so tough that it effectually protects the true eye from the twigs, sharp grass and other obstructions which the snake encounters in its travels, yet it is transparent enough to allow the most perfect vision. Thus if the snake has not a glass eye it may, at any rate, be said to wear eyeglasses. Glazed Eyes.

Needed the Knife. Speaking of table etiquette some time since, General E. Burd Grubb told a story about a man who was justified in eating pie with a knife. Smith was standing in a hotel lobby one day, according to the General, talking to Jones, when the conversation turned to a dinner that had been given at the ome of a mutual acquaintance named

marked Jones, referring to one of the guests. "I thought he had better table manners. When his pie was served he actually ate it with a knife." "I don't blame him for that," was the startling reply of Smith.

"You don't blame him?" repeated

Jones in amazement.

"No," smilingly rejoined Smith, "I have eaten pie at Brown's myself, and it is a wonder to me that Barton did'nt take an axe."—Philadelphia Tele-

graph.

are not caused by anything wrong in the head, but by constipation, biliousness and indigestion. Head-ache powders or tablets may deaden, but cannot cure them.
