TIP BURN OF POTATOES.

(Experimental Farm Notes.)

A trouble which is widely distributed and very prevalent in some seasons, and to which the name "Tip Burn" has been given, is to be found among our potato crops. This trouble takes the form of a gradual burning and drying up of the leaves of the plants, often commencing at a comparatively early stage in their growth, and, in many cases, if allowed to go on unchecked, slowly but surely involving the whole of the plants so that they die down a considerable time before the tubers are fully developed.

The appearance of this trouble in the fields is often mistaken by growers for late blight. There is, however, a marked distinction between the two, for late blight may commence by attacking any part of the

plants—leaves and stems alike—has a dark, water-soaked appearance and in its early stages is damp to the touch, while tip burn invariably commences at the margin or tips of the leaves and has a decidedly dry appearance and touch with the exception of after rain. It appears much earlier in the season than late blight has ever been recorded and does not cause the death of the plants so rapidly. Nor has it ever proven so destructive as late blight, although evidence has been obtained that in seasons when it is severe and where no effort is made to check it, a considerable reduction in the yield of marketable tubers, due to the premature death of the plants from this cause, may result.

Investigators of this trouble are not in agreement as to the cause. The observations of some have led to the belief that a period of hot, dry weather during the growing season causes the leaves to throw off moisture more rapidly than it can be furnished by the plant, the result being the appearance of tip burn. This belief seems, however, to be disputed by the fact that the trouble is not

found in the hot regions of the Western States where the temperature often becomes excessive and the air is especially dry.

More recent investigations lead to the belief that this burning of the leaves probably follows the departure of the insect known as the Potato Leaf Hopper. These investigations are not yet complete, but enough evidence has been produced to serve as a warning to potato growers to keep these insect pests thoroughly under control in an endeavor to avoid tip burn.

We have found in our experimental work with potatoes that Bordeaux mixture will to a large extent control this trouble. In 1918, when it was extremely prevalent, we had several plots to watch, for the purposes of experiment, Bordeaux mixture was not applied. These plots suffered

from a severe attack of tip burn and the plants were all killed down by the second week in August, while other plants on the same land, and to which, for the control of late blight, Bordeaux mixture was regularly and thoroughly applied, suffered to a very slight extent only, the plants remaining green until frost came. Bordeaux mixture acts as a repellent to the Leaf Hopper, as well as a protection to the plants. Many other cases in addition to that referred to have come to our attention bearing evidence that regular and thorough spraying with this mixture will reduce to a minimum the ravages of tip burn.

GEO. PARTRIDGE,
Asst. Plant Pathologist.

The first electric railway in America and the second in the world was operated at the Canadian National Exhibition in the early '80's.

Catarhal Deafness Cannot be Cured by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure catarrhal deafness, and that is by a constitutional remedy. Catarhal deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is a result. Unless the inflammation can be reached and this tube restored to its normal condition, hearing will be destroyed forever. Many cases of deafness are caused by catarrh, which is an inflamed condition of the mucous surfaces. Hall's Catarrh Medicine acts thru the blood on the mucous surfaces of the system.

We will give one hundred dollars for any case of Catarrhal Deafness that cannot be cured by Hall's Catarrh Medicine. Circulars free. All Druggists, 75c.

NOTICE

CLERK'S NOTICE OF FIRST POSTING OF VOTERS' LIST

Voters' List 1920, Municipality of Athens Ontario, County of Leeds

Notice is hereby given that I have transmitted or delivered to the persons mentioned in section 9 of the Ontario Voters' List Act the copies required by said sections to be so transmitted or delivered of the list, made pursuant to said act, of all persons appearing by the last revised Assessment Roll of the Municipality to be entitled to vote in the said Municipality at Elections for Members of the Legislative Assembly and at Municipal Elections; and that the said list was first posted up at my office at Athens on the 14th day of August 1920 and remains there for inspection.

And I hereby call upon all voters to take immediate proceeding to have any errors or omissions corrected by law.

G. W. LEE,

Clerk of the Village of Athens.

Dated this 14th day of August, 1920.

ANOTHER FRONT PORCH CAMPAIGN

The photo shows Mrs. Warren G. Harding, wife of the Republican Presidential candidate, entertaining a little visitor to the front porch of the Harding home in Marion, Ohio. Many mothers of Marion bring their babies to greet the possible next First Lady of the Land. Though childless, Mrs. Harding is very fond of children and never tires of entertaining her little visitors.

Five German warships, which have been turned over to the United States under the terms of the Peace Treaty, steamed into New York harbor on the 9th. The German craft are the old-time dreadnought Ostfriesland, the light cruiser Frankfort, and three destroyers. They will be used for experimental purposes by the United States Navy and later will be destroyed at target practice. Photo shows the Ostfriesland, followed by the Frankfort and one of the destroyers, steaming into Ambrose Channel.

IT'S SO EASY IT'S FUN!

It's the simplest sort of a job to take an old, time-worn chair, a small can of Glidden Jap-a-lac and a brush and in a few minutes' time bring out the beauty of that chair you've hidden for years.

And it's fun to see it's youthfulness return under the magic of the brush; to see again—through this clear, easy flowing and double-durable varnish stain—the beautiful grain of the natural wood.

You can find an old piece of furniture in your attic and any size can of Jap-a-lac at our store. Bring them together. It won't cost you much, and you'll have a lot of fun getting some "brand new" furniture through the magic of Jap-a-lac.

You can also obtain Glidden Paints and Varnishes, for the bigger jobs at
