I am improving every day. I notice if I cut or scratch myself the sore will heal up. I hope you will not stop treating me as long as there is a sign of that terrible disease. I am more afraid of it than death. I believe you have the right medicine for the disease. I feel so thankful to you for the good you have done me; I was a perfect wreck when I came to you, and was on the verge of suicide. To make a sure thing I would like to continue a while longer, so that it will not return. Very respectfully yours. Mrs. L.S.

CHATRAM GRAIN MARKET.;

Planet office, Tuesday evening,

lovember 20. J. B. Stronger & Co., give the followng grain gossip.
Wheat—Owing to the recent heavy

rains, there has been no receipts. The market in the west has also been lower and there is in consequence very little demand for export, but the feel-ing is weak. Buyers are still paying 65 cents standard.

Beans—There is a good lively demand among jobbers for handpicked; but as the process of picking is slow, it is hard to fill orders. A few cars of primes are being inquired for and for the best quality a ready sale is found for beans that will pick at not more than two pounds per bushel. For such a dollar to \$1.05 is readily paid, but for picking stock that will wash from 4 to 6 lb., the price is from 80 to 95c., and of course this latter quality accumu-lates in storage and cannot be sold until handpicked. Oats .- A trifle better demand owing

to light receipts. The quotations are unchanged at 21 to 22c. for mixed, and 22 to 23 for white.

Barley—Dull sale recently owing to
no export demand. About 70 cents is
paid for ordinary feed barley, and for extra qualities 2 to 3 cents more. Corn-Good demand for feeding pur s at the old price of 30c per bush-

poses, at the old price of 30c per bush-el. Receipts will be light for a few days, until there is a change in the weather and buyers will be able to work off stocks in store. Work off stocks in store.

Buckwheat.—A little is arriving, and more could be sold than is coming forward. There is some demand for export at about 40 cents a bushel.

### WON ALL IN SIGHT.

Then This Millionaire Gave Back His Winnings.

Leigh Hunt, Korea's American mining magnate, who has made millions in Mongolia land, says a Vancouver letter, was the centre of at-traction on the steamship Empress of Japan, on the way over, owing to his eccentric conduct. He made ridiculous bets as to the wanderings of seagulls, on the age of a passenger, the velocity of the wind, the exact time by the sun, etc., always giving odds of ten to one, and a ways winning. Before the ship had reached part he engaged five of the crew at enormous wages to go to Korea with him. The ship steward will hereafter receive \$400 instead

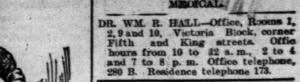

of \$65 a month, as at present, and of two waiters \$60 instead of \$50. His most astounding performance, however, was over a little game of poker. It was a six-handed game, and the limit was the blue sky above. Leigh Hunt bet extravagantly and won every bet. Four players became frightened and quit, only the plucky little vice consul of Belgium, at Pekin, kept on. The Belgiam lost steadily until he owed Hunt \$5,100. Then Hunt

went on. The Beigian lost steadily until he owed Hunt \$5,100. Then Hunt said laconically, "You're only a Belgian, you don't understand our great American game. You had better stop." But the gristy little foreigner would not stop, and when Leigh Hunt proposed to shake dice, double or quit, the Belgian consented.

They started at \$100 a throw and doubled until the Belgian owed the American mining magnate \$8,000. The Belgian sobbed on his arm, saying he was ruined, that his losses were his life's savings.

Hunt got the ship's bible and said to the title foreigner. "Swear to me that you will never play American poker again as long as you live." The Belgian kissed the Bible and said, "I swear," whereupon Hunt handed the Belgian back notes and money amounting to \$8,213 that he had won from him.

"Dr. Pierce's Golden Medical Discovery has proved a great Messing to me," writes Mrs. Rilen E. Bacon, of Shutesbury, Franklin Co., Mass, "Prior to September, 1897, I had doctored for my stomach trouble for several years, going through a course of treatment without any real benefit. In September, 1896, I had very sick spells and grew worse; could eat but little. I commenced to take Dr. Pierce's medicine and in a short time I 'could eat and work. Proved the Feature of the Show in New York.

With a Special Engine it Will Run Fifty Miles it is Claimed.

New York, Nov. 21 .- Something of a sensation was created at the automo bile show by the liquid-air runabout that has been an object of much attention since the show opened. The sensational feat that the automobile did was really to run, a thing of which most persons seemed to think it incapable. There has been a great deal of real interest as well as skepdeal of real interest as well as skepticism in regard to the liquid air "auto," and the announcement that it would go on the track drew an as sorted collection of curious persons. There were professors, mechanics, women investors, and rival "auto" makers so tightly jammed about the makers so tightly jammed about the both that many could not see the process of charging. Only liquid air was put in. It was forced under a pressure from a 'portable metal tank to the copper storage cylinder in the wagon. This is of double construction with a partial vacuum between the inner and outer chambers. From the storage chamber the air passes through a valve and a 'vaporizing' valve a tank to another cylinder that is practically the boiler, for the rest the machine is practically a steam engine, that uses highly compressed air instead of steam, in driving the pis-

While the process of charging was While the process of charging was going on many comments, facetious and otherwise, were heard, and several stung their fingers feeling the ice on the pipes. It took about fifteen minutes to "get up steam," and when the machine really started to move there was loud handclapping. Every one wanted to ride in it, and many were accommodated. A reporter went is every accommodated. A reporter went sev-eral laps around the track and found that there was little vibration, no smell, and just a little puff from the exhaust. The distance the machine will pun is stated variously. From seven to thirty miles has been stated by the exhibitors, but it is explained that a special engine must be built for it, and it will then run fifty miles. This "auto" was so much the feature of the night that a pursuit race sche-dule was called off.
