Despite the activity of the English agents in the United States, whose business it is to prevent the exportation of munitions of war to Great Britain, the Government is convinced from receat advices that such importations are made and that recently there have been some heavy shipments to Ireland. It has therefore been resolved to increase the British military in Ireland and every effort will be made to detect and prevent any further importation. POSTSCRIPT.

Thursday, Aug. 12, 6 p.m.

To-day's despatches from Afghanistan, of London, report that General Roberts is steadily advancing towards the relief of the British garrison at Candahar. His force is five marches distant from Ghuznee, and it is being well provisioned through the Ameer's agents. Candahar is surrounded by a large number of Afghans, who render communication with the garrison difficult. An attack is evidently meditated on Chamen Choki, where there is a small and isolated British force, as Ayoob Khan has detached troops, which are going in that direction.

Meanwhile, harsh measures are being meted out to the insurgents, several large detachments of surrendered Cubans, with their wives and children, having been sent to penal settlements on the African coast. An unavailing protest against this inhuman act was entered by Cuban membars of the Cortes and leading generals.
