Becher, broker, Bank of Commerce building, received the following by private wire from Bartlett, Frazier & Carington today: New York, Aug. 6-Noon.-There wer elements of demoralization in the first minutes of trading this morning, an t is not too much to assert that the suspension of any important house would have produced panic conditions rather than have helped the market. Lon stocks came out, pressure was marked and liquidation of hypothecated securi ties helped to instil fears into traders hearts. The fact that all clearing hous sheets went through helped sentimen and the market steadied, though evidence ing no material strength. Short covering was a favoring factor, but stocks generally were well taken during the secon hour. Stocks could be sold at any tim The opening was irregular, then came severe drive that carried prices dow. The Gould stocks were under pressur and Missouri Pacific broke so sharp that it excited rumors of a concerted at tack. The list began to rally after the early drives, held its own for a time, an did better. Support is appearing in number of stocks. Delivery time toda may be a crucial period. The air is no yet clear.
