

The Colonist.

THURSDAY, MAY 7, 1896.

Published Every Monday and Thursday by The Colonist Printing & Publishing Company, Limited Liability.

W. H. ELLIS, Manager. A. G. SANDISON, Secretary.

TERMS: THE DAILY COLONIST. Published Every Day except Monday.

Per year, postage free to any part of Canada, \$10 00.

Per six months, postage free to any part of Canada, \$5 50.

Per three months, postage free to any part of Canada, \$3 00.

Per month, postage free to any part of Canada, \$1 00.

Subscriptions in all cases are payable strictly in advance.

ADVERTISING RATES. REGULAR COMMERCIAL ADVERTISING, as distinguished from every other kind of advertisement, is published at the following rates, per line, solid nonpareil, the duration of publication to be specified at the time of ordering advertisements.

More than one fortnight and not more than one month, 40 cents.

More than one week and not more than one fortnight, 40 cents.

Not more than one week, 30 cents.

No advertisement under this classification inserted for less than \$2.50, and accepted other than for every-day insertion.

Theoretical advertisements, 10 cents per line each insertion.

Advertisements unaccompanied by specific instructions inserted at the discretion of the publisher.

Advertisements discontinued before expiration of special period will be charged as if continued to full term.

Liberal allowance on yearly and half-yearly contracts.

WEEKLY ADVERTISEMENTS—Ten cents a line each insertion, each insertion. No advertisement inserted for less than \$2.

TRANSIENT ADVERTISING—Per line solid nonpareil: First insertion, 10 cents; each subsequent consecutive insertion, 5 cents. Advertisements not inserted every day, 40 cents per line each insertion. No advertisement inserted for less than \$1.00.

Births, Marriages and Deaths, \$1.00; funeral notices, 50 cents extra.

Where cuts are inserted they must be ALL CUTS—not mounted on wood.

Comments upon our remarks on the reports in circulation relative to an attempt to debase the constituency of Yale by a prodigal use of money, the Times treated its readers to the following very edifying little sermon:

We suppose it natural that to a corrupt mind the idea should occur that Mr. Bostock's success is due to corruption. Honest and honorable men can see other reasons for it, but people of another sort are of course apt to judge according to their own natures.

It is to be hoped that the Times will be benefited by its own sermon, for if it is a sign of a corrupt mind to be continually accusing others of being venal and corrupt, the English language does not contain a word strong enough to apply to the mind of the Times.

It has been for years continually attributing the worst motives to the opponents of its party. According to it they are, all and sundry, steeped to the lips in corruption. "Boodler" is the mildest word it has in its vocabulary for opponents, and a government can hardly make an improvement in a district without being accused of "bribing the people with their own money." We trust that it has now made itself see the error of its ways and that in the future it will be somewhat charitable in its judgment of opponents.

IGNORANT OR MENDACIOUS? The Times on Saturday again attempted to throw doubt upon Col. Prior's status in the government. When it does this it proves itself to be either densely ignorant or shamelessly untruthful and dishonest. The Times, unless it knows as little about the nature of the Cabinet and the position occupied by its members as an untutored swab, knows—cannot help knowing—that Col. Prior is as much a Cabinet minister as any man can be, no matter by what name he is called or what remuneration he receives. No man of intelligence need be told that there are no ranks in the Cabinet, no difference of degree. When the Times, then, tries to create the impression that Col. Prior is in some way the inferior in rank of other Cabinet ministers it deliberately attempts to make its readers believe what it knows is not true; in fact, to injure an opponent by downright, unmitigated lying. It either convicts itself of ignorance of which no school boy should be ashamed, or it shows to the world that to accomplish a purpose it does not scruple to resort to unqualified falsehood.

The very expression which the Times has invented, "a full-fledged cabinet minister," is absurd, for all cabinet ministers are necessarily "full-fledged." Those who are inclined to believe the Times in this matter should ask themselves what the Leader of the Opposition has been about that he did not expose Col. Prior's pretensions if he, in parliament and before the country, claims to occupy a position to which he is not entitled. Does anyone suppose that either he or Mr. Joseph Martin would not have denounced Colonel Prior in the most scathing terms if he had not a perfect right to rank as a Cabinet Minister. But Mr. Martin, though reckless enough in all conscience, had too much regard for his reputation for intelligence and common-sense to call in question what everyone in Ottawa knows is beyond question, namely, Col. Prior's right to sit in one of the seats set apart for the Ministers of the Crown and to exercise the powers and perform the duties of a Minister. Col. Prior's right has been acknowledged by the Governor-General, by the Premier, by the members of the Government, by the Leader of the Opposition, and by all its mem-

POLITICAL PREDICTIONS.

There are prophets still in the land. In every city, town, village and country settlement in every province of the Dominion, there are men who take upon themselves confidently to predict what is to be the result of the general election, not only in the districts to which they severally belong but in the Dominion as a whole. When one attempts to find out the sources of the inspiration of these political prophets the results of his inquiries are most unsatisfactory. It is seen that they must get their information by some supernatural or preternatural means, for it is abundantly evident they do not get it in the ordinary way. When they are questioned closely it is found in ninety-nine cases out of a hundred that they have not been in communication with any one who knows any more of the opinions and intentions of his neighbors and fellow-countrymen than they do themselves. Yet it is the guesses and surmises and inventions of these prophets, who really know nothing about the matter, that the public generally are expected to take as the voice of public opinion.

The shrewdest and the most experienced of Canadian politicians once said that the two most uncertain things in the world are a horse race and an election. Yet, notwithstanding this dictum of one who knew, the prophets keep on prophesying and expect that some attention will be paid to their predictions. Ask one of the prophets how his next door neighbor is going to vote, and the chances are ten to one that he will answer in such a way as will convince the inquirer that he knows nothing about that neighbor's intentions. Yet this same prophet will, without hesitation or diffidence, tell you how men some two thousand miles and more away are going to cast their ballots.

Then are there some politicians who think it clever and expedient to keep continually predicting a sweeping victory for their party when they have no more evidence on which to form an opinion as to what the result of the elections will be than they have to tell what kind of weather there will be in Victoria this day twelve months. But it encourages their party to tell its members that they are sure of victory and so they go on prophesying in the dark, and so to speak. We question very much the efficacy of this policy and there can be no doubt that those who place the slightest reliance on ninety-nine hundredths of the election predictions they hear are certain to be deceived.

A SERIOUS INJURY. One of the injuries which the Obstructionists in the late session of Parliament inflicted on the country was the killing of the scheme to institute a trade with Great Britain in chilled meat. The intention of the Government was to vote a sum of money, \$60,000 if we do not mistake, to establish this trade.

The scheme was devised by Professor Robertson, who, by the way, is in politics a Liberal. The exclusion of Canadian store cattle from the British market it was feared would be a serious injury to the stock-raising industry of the Dominion. Professor Robertson was of a different opinion. From observations he had made he was led to conclude that the order making it compulsory to kill Canadian cattle as soon as they were landed in Great Britain instead of being an injury to Canada would be, if his advice were followed and his scheme adopted, a blessing in disguise. This scheme was to fatten the cattle at home, kill them at a Canadian seaport and send the carcasses chilled—not frozen—to the British market. The following are the details of the scheme as they are set forth in a late number of the Hamilton Spectator:

In his evidence before the agricultural committee of the house of commons, Mr. Robertson compared chilled beef with live cattle. For the six months ending June 30, 1895, he found that the prime or first quality of domestic cattle sold in London at \$8 per hundred pounds live weight, and the price in Liverpool for the same goods was \$7.43.

At the same time in these markets hindquarters of beef sent in refrigerators from the United States sold at from \$10.50 to \$13.50 per hundred pounds wholesale. At Birkenhead and Deptford, not hindquarters alone, but whole carcasses, were sold at \$10 to \$10.75 per hundred pounds. The report of the secretary of agriculture for the United States states that the maximum price in England for chilled beef from the United States has been considerably above the top prices at any time obtainable for beef from American cattle, killed upon landing at the abattoirs of either Deptford or Birkenhead.

It must be remembered that Mr. Robertson's scheme is for the carrying of chilled beef to England—not frozen beef. Chilled beef improves en route to freeze beef deteriorates it. The quality of beef is also deteriorated when shipped alive. Chilled beef and frozen beef are quite different in quality, and the difference is especially shown when roasts are served cold. In the British market Australian frozen beef brought from \$6.50 to \$7 per hundred pounds as against \$9 to \$11.50 for chilled beef.

Mr. Robertson proceeded in his evidence to give the result of the shipment of 280 good cattle to Liverpool. The beef of these cattle was disposed of to the very best possible advantage. Mr. Robertson goes into the details of the transaction, and shows that the total revenue, at Montreal, from the ship-

NEWS OF THE PROVINCE

Lumber Factory at Hastings Destroyed by Fire—The Spring Salmon Run Improving.

QUEEN'S BIRTHDAY AT NANAIMO—Fishing at Cowichan—Accident in a Sawmill.

VANCOUVER. VANCOUVER, May 4.—Buse's lumber factory and mill at Hastings were destroyed by fire early this morning. The mill was saved, and the rest of the buildings would have been saved had not the fire department been four miles from the scene of the fire. The insurance companies interested are the Phoenix, \$1,500; National of Ireland, \$1,500; North American, \$500. The loss is estimated at \$6,000. The mill had been idle for some time. Ernest Buse, until a year ago a wealthy Vancouver lumberman, has been succeeded by a New York matrimonial agency for \$1,000 commission for obtaining a wife. Mr. Buse paid \$40, and thought it ample. The court decided that he must pay the additional \$900.

WESTMINSTER. WESTMINSTER, May 4.—C. C. Fisher has been appointed assessor and collector for Westminster district. The city band will receive the moral and financial support of the present council. Wholesale liquor licenses here are to be increased to \$150 and it will be optional with a wholesale dealer whether he takes out a shop license. It is suggested that shop licenses permitting the sale of liquor in small quantities be increased from \$100 to \$300. Hotels in Chilliwack, calling themselves clubs, have been selling liquor to so-called members and conducting card games. In an effort to close these so-called clubs complaints have been laid. On Saturday William Venard, of the Queen's hotel, was charged with keeping a gaming house, and fined \$25. The coroner's jury have returned a verdict of "drowned" in the case of Cheam Joe, whose body was found after a long search by the provincial police. The government has offered a reward of \$100 for the finding of the body, as murder was suspected. The coroner's jury have decided otherwise. The spring salmon run is improving. A carload of fresh fish was sent East by the Texaco Line Co. on Saturday. A quartz gold claim has been discovered near Lillooet and it is a rich one. Many gold claims have been discovered recently in that vicinity.

NANAIMO. NANAIMO, May 4.—The Ellwell sailed at daylight on Saturday morning, less than ten days from San Francisco at 4 o'clock that afternoon. With a strong wind from the north, therefore, Capt. Ryder may possibly beat the Wilna's record. In view of the approaching celebration of the Queen's birthday, the waterfront presents a scene of great activity. The yacht, the Venus, has been launched, but will not be fitted up completely for a few weeks. Foreman & Campbell's new racer is making rapid progress and will probably be ready for the start next week, and S. Wallace is entirely renovating the Whisk. Thomas Goldworthy, a pioneer resident of this city and district, died at the Nanaimo hospital on Saturday afternoon, after a long illness. He was 70 years of age, and had been in the city for many years. He was a native of Camborne, Cornwall, England, and had been in the city for many years. He was a native of Camborne, Cornwall, England, and had been in the city for many years. He was a native of Camborne, Cornwall, England, and had been in the city for many years.

NANAIMO. NANAIMO, May 5.—Provincial Constable Cox, of Alberni, came down by Pinkerton's stage, accompanied by W. Watts, an interpreter, and a number of Indian witnesses in the stabbing case in connection with which Keetloosh, the alleged assailant, is under arrest. The whalback City of Everett arrived on Saturday night on three days eight hours from San Francisco, an exceptionally rapid passage. Steamship Progress arrived at Departure Bay yesterday morning, having completed the trip from San Francisco in eight hours' better time than the Everett. Application was made yesterday before Judge Harrison by C. H. Beever for the dissolution of the Citizens' Building Society of Nanaimo. The application will be considered at 11 a.m. on Monday, June 8. More than twenty-six claims were stated and recorded in this district last month, the majority being situated near Nanaimo, Nanaimo lakes and Valdez Island. C. F. Anderson has recorded a quartz claim called the Lincoln, situated in Nanaimo district, on the branch of Harry creek, about six miles west of Nanaimo bay, and J. P. Anderson and F. A. Olberg also recorded the Acme Nos. 1 and 2, and the Acta Nos. 1 and 2, situated in Nanaimo district. The examination for coal mine managers' certificates will be held at the old court house adjoining the government offices, on Tuesday morning, May 12. There are six candidates in all. Messrs. R. Adam, J. McKenzie, J. Bowden and W. Johnson left for the Cassiar country yesterday in quest of gold. They will make the journey via the C.P.R. and along the Old Cariboo trail. They will purchase pack horses and provisions en route.

DUNCAN. DUNCAN, May 4.—About \$600 damage was done at Lloyd's saw mill, Westholme, by the bursting of a fly wheel, which caused a smash up of the belting and part of the mill building. The prospecting for gold in the Nit-nat river district is being evaded by way of Cowichan lake. Mr. E. B. McKay, Mr. C. H. Dickie and Mr. D. McGillivray had some good trout fishing at Cowichan lake last week, the last named two gentlemen getting over 40 pounds in a day. The water at the lake is now in good order and fish

NEWS OF THE PROVINCE

are plentiful. The Lakeside stage is running regularly from here to the lake on Mondays, Wednesdays and Fridays. Mr. W. F. Burton, Mr. A. W. Jones and other Victorians had good sport with the trout in the Cowichan river, Quamichan and Somenos lakes on Saturday last.

GOLDEN. (From the Era.) The s.s. Duchess made her first trip of the season on Tuesday, though the water was low for the time of year. They had a very large amount of freight including machinery for the Wild Horse hydraulic mines. Mr. Dollinridge arrived at the beginning of the week from Toronto. He is interested in some mining properties in this neighborhood and went to Ottertail on Thursday to examine some galena claims. He also reports that Mr. Townsend is preparing to commence active work on the International gold mine. Mr. Askwith is also making the same preparations for the Bobbie Burns mine in the same district. Capt. Armstrong has commenced to bring his ore from the Vermont creek silver mine down the river per s.s. Duchess to Golden, and will ship it from here to one of the smelters. W. J. Rooke Cowell writes as follows: Last summer at the request of a gentleman who was likely to acquire an interest in the property, I made a series of experiments on the Vermont creek bismuth ore. The result of several assays showed the percentage of bismuth to vary from 25 per cent. to 0 per cent. In only one instance did I fail to find bismuth though in several others the percentage was very small. I turned my attention to the profitable extraction of the bismuth and in one case succeeded in extracting bismuth in the pure state, but on estimating the cost of plant and working expenses for this process, I found they would be prohibitive and so was obliged to abandon the method. This ore has, I understand, been submitted to various experts in England, Germany and America, with a view of finding a suitable process for reducing the bismuth, but without success. It is to be hoped, now Mr. Leake has taken the subject, that the matter will attract the attention of the metallurgists of this province and some fresh light be thrown on the much vexed question of what is locally known as the "conundrum ore."

NEW DENVER. (From the Ledger.) Work has been commenced on the Congo and Little Daisy, two claims on Eight Mile creek. In New Denver, during April more than a quarter million dollars' worth of mining claims were bonded, principally in the dry ore belt at the foot of Slocan lake. Plunkett & Dunbar bonded the Bondholder, Pine Log, Rosebud and Lone Star for \$40,000, paying \$500 down. These claims are owned by Charles Martin, Dan McCuaig, John McFarlane and John Sheplem. They are situated on Ten Mile and Springer creek slopes, about six miles from Slocan lake. Last week was a great time in New Denver for the bonding of claims. Plunkett & Dunbar, of Vancouver, did a handsome business in that line. Dunbar bonded most of the Two Friends group for \$50,000. The Oxberry group went to R. Marpole for a \$25,000 option. The Crusader group, owned by Clay Fass and the government, was bonded for \$50,000. Particulars of the bonding of other claims are given elsewhere. The amount of cash paid down was small, most of the next payments falling due in July, October, next April and May. When the finishing touches are completed at the Slocan Star concentrator power will be turned on and the mill commence to grind, probably next week. Another tunnel, which makes the fifth at this great mine, was commenced on Thursday. It will tap the ore at a depth of 660 feet, and will have to be run 800 feet before the ledge is reached. This summer vast amount of development will be commenced and completed. A contract was recently made for the shipment of twelve thousand tons of ore. The C.P.R. will carry eight thousand tons of it and the K. & S. the balance. The ore goes to Omineca, and it will take eight months to complete the contract, on a daily output of fifty tons. On the first of last November W. K. Richmond, and Max Heckmann, who were grub staked by Hiram Clever and Charles Fass, located what is known as the Alpine group. The group consists of four claims, the Berne, Swiss, Highland Chief and Kootenay Pass. The claims are on an unnamed creek, about seven miles from the arm of Kootenay lake and about sixteen miles from Slocan lake. The ledge matter is from 18 to 56 inches, and assays showed 26 ounces in free milling gold, with about two ounces in silver. Two of these claims, the Highland Chief and the Swiss, were bonded last week to R. Marpole, for \$35,000; \$400 in cash, \$2,600 on the 15th of July; \$10,000 October 1, and the balance in a year. If it has been possible to locate the claims a greater cash deposit would have been made. At present it is impossible to reach them owing to the snow.

KOOTENAY. (From the Kootenay Mail.) Four claims have been located at Arrowhead. Three claims have been located by Glendenning and partner between Pingston and Fossil creeks, on the westshore of Arrow lake. A rich ledge, two feet wide, of gold ore has been located by Charles Bullard on Fish creek. It will be worked this year. Charlie Norleins came down from the Hidden Treasure, on Gold stream, on Saturday. He had some placer gold with him. Mr. Ballegaard has sold his house and lot on Front street, to Messrs. Vandall & Norton for a consideration of \$1,000. Terms, one third down, balance in six months. A site has been chosen for a bridge to cross the Illecillewaet river, which, with a trail, will give access to the North Fork camp. On this camp there are several properties on which work to the extent of \$1,800 has been done, and three carry crown grants. All that has held it back was egress to railroad. Mr. McCallum, of the Round Hill claim, in Illecillewaet, will now get out 100 tons of ore. H. S. Howard Letendre and Ed. Bloer are down from the Big Hole

NEWS OF THE PROVINCE

claim on Gold Stream. They have put in an immense piece of work, having now 800 feet of fluming, 20 feet wide at the mouth, and averaging 12 feet in width throughout. They put this all in by hand, using whip saws and round timbers.

FORT STEELE. (From the Fort Steele Prospector.) We have been informed that there are many men on their way to Fort Steele in search of employment. This is no place for men in search of work, as there is nothing for them to do, and at least two men for every job that turns up here at the present time. Men that wish to prospect and have funds enough to carry them through the season will find that this is just the right place to come to, as we have a mineral country that has not been prospected to any great extent, but for mechanics and laborers there is absolutely nothing for them to do. An offer of \$35,000 has recently been made for the Sullivan group by an English syndicate. The terms are 10 per cent. down, the balance in three payments of \$10,000 each. Should the proprietors decide to accept the offer, an expert will at once be sent out to examine and arrange for development work. This property is situated on the same belt of mineral as the North Star. It is reported that there is a whiskey den, close to the line at Tobacco Plains, in full blast. The attention of the Montana authorities is called to it, in hopes that an effort will be made to do it up, as it has a demoralizing tendency and will cause trouble. The result of Mr. R. O. Jennings' visit to Spokane was the formation of a company to work the Deane and the All-Over. The company has plenty of capital, and will commence work as soon as the necessary preparations can be made. Work has commenced on the bridge. It will take about five weeks to complete the draw. The Banks brothers are down from the Dardanelles. They report the mine in good shape, and the lead increasing in width. It is an assured fact that American capitalists from Spokane will visit Fort Steele during the coming season to look over the situation, and to invest in mining property. At the present time there are three American companies interested in this section. The steamer R. P. Rithet, which has lain idle during the winter months, takes the place of the Princess Louisa on the New Westminster-Victoria route to-day.
