

THE STRAW AND ENSILAGE CUTTER TRADE has narrowed down to ONE and that is the

Wilkinson Climax Pneumatic

We have captured the trade by sheer hard work and hard cash expended in experimenting. Our improvements are all patented, and **OUR** patents are valid. We have now a large number in various parts of the Dominion. If you have large quantities of corn and straw to cut you simply cannot afford to be without one. Orders are rushing in; order promptly, and avoid disappointment.

If you are in need of a Steel Land Roller order now and get the use of it this fall and at this year's prices: no one can tell how much more you will have to pay for a

Steel Land Roller

next spring, but the increase will be large.

PLOUGHS - Our Name on Every Part. **POINTS and SOLES** - Our Name and Address on all of them. See that you get them, they last twice as long. **DRILL PLOUGHS**

Gang Ploughs All Sizes

Our No. 4 Improved is a 10-inch World Beater.
