

The Central Business College

Yonge and Gerrard Sts., Toronto

Combines proper equipment, a large staff of experienced Teachers, and thorough courses of training in **Accounting, Telegraphy, Shorthand, Typewriting, Illustrating and Pen Art**, in its work of preparing young men and women for commercial positions.

TWELVE

regular Teachers as shown in this line, 100 Typewriting Machines, complete sets of Wireless Telegraph instruments, an annual enrolment of 768 members, with the majority already in good positions, indicate something of the character of our splendid school.

Fall Session opens Sept. 2, but students are admitted at any time. New Catalogue ready. Write for it.

W. H. SHAW, Principal.

University of Toronto

MEDICAL FACULTY

THE regular course of instruction consists of Four Sessions, of eight months each, commencing October 1st. There is a distinct and separate course for each of the four years.

The lectures and demonstrations in the subjects of the First and Second years are given in the Biological Laboratory and the lecture rooms of the University.

Lectures and demonstrations in the subjects of the Third and Fourth years are given in the building of the Medical Faculty, corner of Gerrard and Sackville streets.

To meet the requirements of the Ontario Medical Council, a course of instruction is conducted during a Fifth year. This is entirely optional as far as the University of Toronto is concerned.

(Clinical teaching (largely bedside) is given in the Toronto General Hospital, Burnside Lying-in Hospital, St. Michael's Hospital, Hospital for Sick Children, and other medical charities of Toronto.

The degrees conferred by the University of Toronto in Medicine are Bachelor of Medicine (M.B.), and Doctor of Medicine (M.D.). Students may take a combined course in Arts and Medicine if they wish to do so. Arts students who are taking the Honour course in Natural Science are able to fulfil the requirements of the primary work in Medicine during their final years in Arts, and thus it is possible to obtain the degrees of B.A. and M.B. upon six years' University training.

Attention is directed to the efficient equipment of the University laboratories for instruction in the practical subjects of the Medical curriculum. Recently very extensive additions have been made to the equipment in the Department of Pathology, and the facilities for providing instruction in that important subject are now unsurpassed, and equal those existing in the other University laboratories.

There are special research scholarships offered to graduates in Medicine, and every opportunity is now offered for scientific research work in any of the various laboratories of the University, under the direct supervision of the Professor in charge.

The Faculty provide three medals for the graduating class (one gold and two silver). There are also scholarships available for undergraduates in the First and Second years; these are awarded to the candidates on the results of the annual examinations.

Further information regarding scholarships, medals, etc., may be obtained from the Calendar, or on application to the Secretary.

R. A. REEVE, B.A., M.D.,
Dean.

A. PRINROSE, M.B.,
Secretary,
Biological Department, University of Toronto.
